* In the current context, it appears that the text contains a series of numbers and references, possibly indicating dates or data points. However, without further context or clarification, it is challenging to accurately interpret the content.

* While the text includes various symbols and characters, it is not immediately clear what they represent. The presence of what seems to be a patent or legal document is suggested by the use of terms like "patent number" and "application number." However, without a clear understanding of the context, it is difficult to provide a comprehensive translation.

* The document includes a list of numbers, possibly indicating sections or parts of a larger text. The numbers range from 1 to 13,700, which might suggest a detailed analysis or enumeration of points.

* The text contains several references to patent applications and legal documents, indicating a focus on intellectual property or regulatory compliance. The inclusion of names like "Mü" and "Müy" suggests a query or reference to specific individuals or entities related to the patent or application.

* There is a mention of "trace out" and "trace out" in the document, which could refer to a technical process or method. The presence of these terms in a legal or technical context implies a focus on detailed examination or measurement.

* The text includes a reference to a "C" and "H", which could indicate chemical elements or components, suggesting a scientific or technical discussion.

* Overall, the document appears to be a complex mixture of legal, technical, and scientific references, possibly related to a patent application or a legal case involving intellectual property.
16th February, 2008

The figures shown in the table below indicate the percentage of the population that had access to various services in the year 2004 and 2007. The data for the years 2005, 2006, and 2007 are also included for comparison. The percentage of the population that had access to safe drinking water, basic sanitation, and electricity increased from 2004 to 2007. The figures show a significant improvement in the provision of these services over the years.

<table>
<thead>
<tr>
<th>Year</th>
<th>Safe Drinking Water Access</th>
<th>Basic Sanitation Access</th>

<tr>
<td>2006</td>
<td>48%</td>
<td>60%</td>
<td>75%</td>
</tr>
<tr>
<td>2007</td>
<td>52%</td>
<td>64%</td>
<td>78%</td>
</tr>
</tbody>
</table>

The data indicate that there is a steady increase in the access to these basic services over the years. The percentage of the population that had access to basic sanitation and electricity increased by 4% and 8% respectively from 2004 to 2007. The increase in the provision of safe drinking water was the most significant, with an increase of 4% from 2004 to 2007.

The table also shows that the percentage of the population that had access to these services varied across different regions and communities. The government has initiated various programs to improve access to these services, and the data shows the effectiveness of these programs.

The figures indicate that there is a need for further improvement in the provision of these basic services, especially in certain regions. The government should continue to focus on improving access to basic services, as it is crucial for the well-being of the population.

SRI TIRUMALA SRINIVASULU: Mr. Chairman, Sir, the Hon'ble Minister has just now stated that the percentage of detection is about 95%. Hence, I would like to know through you from the Hon'ble Minister as to whether the International, inter-state and cult gangs are being involved in kidnapping the children because it is everybody’s concern. I request the Hon'ble Minister to kindly reply.

SILING UP OF NIZAMSAGAR PROJECT

LCQ No. 41(739):
SRI B. KAMALAKER RAO

Will the Hon’ble Minister for Major & Medium Irrigation be pleased to state:

a. Whether it has been brought to the notice of the Govt. that water storage capacity of Nizamsagar project is decreasing day by day.

b. If so the reasons therefor.

c. The water storage capacity of the said project at present together with developed ayacut under command.

d. The measures being taken to provide water to full ayacut as envisaged earlier.
MINISTER FOR MAJOR AND MINOR IRRIGATION (SRI PONNALA LAXMAIAH):

ANSWER –

a. Nizamsagar project was constructed in 1931 with a storage capacity of 29.72 TMC. But, the capacity was reduced to 11.80 TMC over a period of 4 decades. Subsequently, the Reservoir capacity has been increased to 17.80 TMC by raising the FRL from 1400.50 ft. to 1405.00 ft.

b. The Storage capacity got reduced due to siltation in the Reservoir.

c. The present storage capacity of the project is 17.80 TMC at FRL + 1405.00 Ft and total ayacut under the command is 2,31,339 acres.

d. Out of 2,31,339 Acres ayacut 1,16,000 Acres is tagged on to the following LI Schemes.

1. Alisagar Lift Irrigation scheme form Godavari River to supplement D/50 to D/73 for an ayacut of 53,793 acres. The scheme is completed and functioning.
2. Agrula Rajaram & Gutpa Lift Irrigation Scheme from Godavari river to supplement D/74 to D/82 for an ayacut of 38,792 acres is nearing completion.
3. (11) Nos. of APSIDC Lift Irrigation schemes to supplement 23,415 acres.

SRI. B.KAMALAKER RAO: Sir, I could understand that reduction of the water supply may be due to the siltation. See, this being the culprit, what are the steps that Government is taking? Sir, siltation is the big problem in all the projects. It is also the problem elsewhere I have raised this question last time also. It was not properly answered. Sir they have put sluices walls in every project, no sluice wall has been repaired neither been attended. They have not been repaired for ages and decades. Sir particularly in this case, whether any one has attended to the sluices walls which is supportive for desiltation. Sir, regarding desiltation, we have got lot of avenues where we can reduce the desiltation. Particularly Sir, the failure of such a Government in the state in taking up afforestation in Nizamabad sagar project to prevent silt from catchments area, in spite of the fact that the Central Government is ready to make.

MR.CHAIRMAN: You put supplementary

SRI.B. KAMALAKER RAO: Supplementary is that. Why not the Government is taking the funds from central Government doing the afforestation, so as to get the reply to the siltation. That is my question Sir. See we have got lot of avenues for controlling the desiltation. See this is one of the avenues, where the Central Government is coming forward to attend to our Government, but our Government is not able to take the help of the Central Government and their funds; that is one of the solution sir and the other solution is, there is Navy; Navy is ready to give their swimmers to come and see the sluices. Are we taking the help of navy when they are ready? Then, why are we not ready to attend to
16th February, 2008 15

the sluice repair Sir? This sluice repairs is a big issue. If they are repaired, we will be controlling. This Government or earlier Government, no one is taking care of this aspect of issue Sir. I have got many issues.

MR.CHAIRMAN: it is not coming to supplementary, Instead of Minister he is telling. You are giving more details to the Minister before he is starting
