3. Theorem (Hölder): Let $f$ be a function in $L^p$ and $L^q$. Then $\|f\|_r \leq C \|f\|_p \|f\|_q$ for all $r$ such that $1/p + 1/q = 1/r$.

Proof: We prove the case $r > 1$. The case $r < 1$ is similar.

Let $f \in L^p$ and $g \in L^q$. We want to show that $\int |fg|^r \leq C \int |f|^p \int |g|^q$.

Define $h(x) = \min\{f(x), 1\}$ and $k(x) = \min\{g(x), 1\}$. Then $h \in L^p$ and $k \in L^q$.

Thus, $|fg|^r = |h^r k^r|$ for $r > 1$, and

$$\int |fg|^r = \int |h^r k^r| \leq \int |h|^p \int |k|^q = \|h\|_p \|k\|_q = \|f\|_p \|g\|_q.$$

This completes the proof.

4. Theorem (Minkowski): Let $f \in L^p$ and $g \in L^q$. Then $\|f + g\|_r \leq \|f\|_r + \|g\|_r$ for all $r$ such that $1/p + 1/q = 1/r$.

Proof: We prove the case $r > 1$. The case $r < 1$ is similar.

Let $f \in L^p$ and $g \in L^q$. We want to show that $\int |f + g|^r \leq \int |f|^p + \int |g|^q$.

Define $h(x) = \min\{f(x), 1\}$ and $k(x) = \min\{g(x), 1\}$. Then $h \in L^p$ and $k \in L^q$.

Thus, $|f + g|^r = |h^r k^r|$ for $r > 1$, and

$$\int |f + g|^r = \int |h^r k^r| \leq \int |h|^p + \int |k|^q = \|h\|_p + \|k\|_q = \|f\|_p + \|g\|_q.$$

This completes the proof.

5. Theorem (Fatou): Let $\{f_n\}$ be a sequence of functions in $L^p$. Then $f \in L^p$ and $\|f\|_p \leq \liminf \|f_n\|_p$.

Proof: We prove the case $p > 1$. The case $p < 1$ is similar.

Let $f \in L^p$. We want to show that $\int \liminf |f_n|^p \leq \int |f|^p$.

Define $h(x) = \liminf f_n(x)$. Then $h \in L^p$.

Thus, $|f|^p = |h|^p$ for $p > 1$, and

$$\int |f|^p = \int |h|^p \leq \liminf \int |f_n|^p = \liminf \|f_n\|_p.$$

This completes the proof.
MADAM SPEAKER: Question No. 104 (794) is postponed at the request of the Member. Question No. 105 (733) is postponed at the request of the Minister.
Any person who intends to sink a well for the purpose of irrigation or for any other purpose, within a distance of 200 Metres or as the case may be 500 Metres from public drinking water source, shall apply for permission to the appropriate authority in such manner on payment of such fees as may be prescribed.

SRI ASADUDDIN OWAISI (Charminar): Chairman Sir, it is a fact that never in the history of Hyderabad we have received such a heavy rainfall in 24 hours. In 24 hours the Hyderabad city received 24 cms. of rainfall. More than 20 people have died in this heavy rainfall. 35,000 people have been displaced. More than 15,000 houses have been submerged in water. The point here is that last Wednesday the Hon'ble Chief Minister had made a statement in this august House that the destruction has taken place in Nandyal. People are going to be evacuated from Musi Riverbed and warnings have been given to all people living in low-lying areas. What I would like to point out to the Hon'ble Chief Minister through you is that the Indian Meteorological Department has given a categorical warning. The Director Sri C.V.Bhadram gave a forecast which ended at 8.30 on Thursday morning. The general forecast to Telangana is moderate to heavy rain at some places and in some isolated places heavy rain. This was issued to the media, Government and the Revenue authorities. The forecast according to the IMD is in five categories: Light rainfall 0.25 cm to 1.00 cm, moderate rainfall 1 to 3 cms rather heavy rainfall 4 to 6 cms., heavy rainfall 7 to 12 cms. and very heavy rainfall 13 cms. and above. Hyderabad received 24 cms., Hakimpet 18 cms., Pargi 14 cms. Nagarjunasagar 13 cms. Tandur 11 cms. Ganavaram 11 cms. and Medak 8 cms. Their warning was absolutely wrong. I am not blaming the Hon'ble Chief Minister. We are laymen. We are not experts in forecast. But when an expert Body like IMD had given a warning clearly stating that the rains are likely to occur over Telangana, why the warning was ignored, and why this warning was not communicated to the people living in low-lying areas? This the Government has to answer and because of timely action not being taken and because of timely relief not being provided, such huge loss of property has taken place. 35,000 persons are displaced according to the Government figure. So many thousands are still under submergence.

I would like to point out to the Hon'ble Chief Minister regarding Hussain Sagar. When foundation for Necklace road was laid by the previous Government and when it was inaugurated by this Government, it was brought on record at that time that laying of Necklace road would cause havoc to the people living in Ashoknagar and Gandhinagar. Because of the illogical planning .......

We are totally dedicated to serve the people of our state. Please try to understand us. No question of compromise.

SRI ASADUDDIN OWAISI: Sir, There is no question of compromise on any issue which pertains to our state. I am not an engineer. But, still I could remember very well that the Conservationists are still against Neckless Road, because of its partition, if you want, we can all go and see that area where the natural flow of water is getting disturbed. The Hon'ble Chief Minister is right that because of encroachments in the nalas, all these problems are arising. In my Hon'ble Colleague's constituency, in Musheerabad near Kalpana theatre, before 1985-86 it was totally a field area. Now in the same area huge structures have come up and whenever the water level increases in Hussain Sagar, the low-lying areas in which people have constructed their own houses, are being inundated and are suffering a lot. I request the Hon'ble Chief Minister to kindly look into this matter and direct the Hyderabad District Collector and the MCH Commissioner for taking necessary action. I am not blaming the Government. When the IMD officials are there, it is their duty to forecast the weather and alert the people. It is a fact that for the first time during the last forty years, the City of Hyderabad has recorded 25 c.m. of rainfall. On 1st August, 1954, the City of Hyderabad had recorded 19.05 c.m. of rainfall and on 28th September, 1908, when the City of Hyderabad had recorded 15.32 cm. of rainfall, the then Nizam had formed a City Development Council and had constructed this Assembly building, Naya-pool bridge, High Court building, Osmania University building and Osmania Hospital and sewerage lanes were formed in the whole City of Hyderabad. Now, there is every need for this Government to act on these lines.

SRI ASADUDDIN OWAISI: Sir, I will conclude my speech. The then Nizam had prepared the master plan to the City of Hyderabad for the thirty years. Let the Hon'ble Chief Minister and the Commissioner of MCH say what master plan has been prepared by them? Where did the 2000 year master plan go? Has it been implemented? When will this government prepare master plan upto the year 2011. The MCH has to prepare a master plan where development should take place and such areas have to be identified by it for example where concrete buildings will come up, where market places will come up, where schools and cinema halls come up. Why are they not doing this exercise? For this, not only this government, even the previous governments should also be blamed. In Old City, the drainage water from Yakutpura, Chandrayangutta and other areas is flowing into the Musi River which is the biggest river. If you ask any Municipal Engineer, he will say this fact. The way it was designed is that no silt is being accumulated in this river. What have we done for the last twenty years? The then Nizam government laid sub lanes adjacent to main lanes and all these lanes were coming through Falaknuma and Charminar area and you cannot find any silt over there. I request the Hon'ble Chief Minister to kindly look into these matters. The City of Hyderabad has experienced one of the greatest disasters now and it is high time for the Government to wake-up and if necessary, the Government should take some hard decisions. As the representatives of the people, we will convince them and we will support the decisions of the Government. People living in posh colonies are not the
real sufferers, but only the middle class people and the people who are living in the low lying and slum areas are suffering and they are looking to the Government to come to their rescue immediately. The important point over here is that the people living in Ashoknagar area, which is a posh colony, are also affected by these floods to-day. Several other areas viz. Madarsaheb Makta, Rasoolpura, Shakepet, Hakeempet, Nadeem colony, are also being inundated in water whenever there is low rainfall. The government on top priority basis should try to control all these things.

SRI ASADUDDIN OWAISI: In Nadeem colony, Virasat colony, Lakshmi nagar, Miraj colony, Hasimnagar, Balreddynagar, Heeranagar, Hakeempet, Durganagar, and other areas are inundated in heavy flood waters and so as to shift the people from these areas, boats are being used over here. Whenever there will be low rainfall, these areas will be inundated. Last year during the months of August and September, when there was rainfall, these areas were inundated and when water recedes, the MCH Commissioner will convene a meeting in connection with the relief measures. What are the reasons for all these problems? Why can't this government prepare a pucca master plan? We have given proposals to the MCH Commissioner and to the Government. We have also shown the areas to the officials concerned from where drainage water should be diverted and where additional sewerage lanes have to be laid. Despite that, so far, no action has been taken-up. Yesterday, Sri Tammineni Sitaram has visited Nadeem colony and he himself has seen the prevailing situation there. During the year 1995, the municipal authorities have started a new sewerage lane, but despite lapse of five years, the works are not completed. If these works were completed, today's disaster would have been avoided. Atleast now, you make some plan. Any new sewerage line should serve the purpose not just for two years or three years, but for another fifty years, they should serve the purpose. For this, if required, the State Government should approach the Central Government for more funds. The area of Carvan constituency which is being represented by my party Legislator, Sri Syed Sajjad, is full of flood waters and a large number of people are displaced there. In my constituency also, the people, due to gastro-enterities, fell sick and so far, no officer has gone over there to supply them medicines. Still 100 more houses are submerged in water. Therefore, I request the Government to kindly help them by providing food, clothing, medicines and shelter. Sir, in the City of Hyderabad, we have Nuclear Fuel Complex, DRDL, Defence and other important factories. During such disastrous periods, how can we protect them. My request to this government is that in these factories areas, no new residential colonies should come up, otherwise, we cannot protect them.

Sir, one more suggestion to the government is that the whole City of Hyderabad is full of flood water and my apprehension is that the people may fall sick due to gastro-enterities and such other problems. As it is high time, the Government should prepare a master plan for laying new sewerage lines. The Managing Director of Hyderabad Metro Water Works Sewerage & Sewage Board, has gone on record that with an estimated cost of Rs. 90.00 crores new sewerage lines would be laid in Hyderabad City. Therefore, I request the Hon'ble Chief Minister to release these funds for immediately taking up these works.
36
SRI ASADUDDIN OWAISI: Speaker Sir, the Hon'ble Chief Minister has mentioned that the Eleventh Finance Commission has done injustice to us. Here, I would like to give one example. More than Rs.12 crores have been spent on the Nandanavanam Project. More than 500 families were made to move to new premises. What happened to the drain? The whole drain is finished. In this Assembly, we have protested against the Nandanavanam Project by saying that people's money will go waste and we requested the Government not to go for Nandanavanam Project. But the Government did not heed to our advice. That Project is finished. Rs.50 lakhs has been given to a contractor. The whole amount has gone into the drain. I would only request the Hon'ble Chief Minister to take steps to prevent throwing of debris in the areas between Nayapul and Chaderghat Bridge. I also request the Hon'ble Chief Minister to take steps to remove encroachments in the said area.

Speaker Sir, through you next, I would like to invite the attention of the Hon'ble Chief Minister to the Balkapur Nala. So many illegal constructions have come up in the said area. I would like to know as to the names of the land grabbers who have sold this Balkapur Nala? The encroachments have to be immediately removed and we will definitely cooperate with the Government in this matter. Another thing I would like to bring to the notice of the Government is that military people have stopped the outlet. That is the reason as to why the people in the Carvan area are suffering. I would request the Hon'ble Chief Minister to take up this matter and see that the Chief Secretary hold talks with the Sub Area Commander and the outlet is opened. Otherwise, if the said outlet is not opened, then there is the inherent danger of getting the whole area submerged under water. We have to apprise them with the situation and in any case, if they feel that any injustice is being caused to them we can construct an additional nala in the land belonging to military authorities.

Lastly, through you Speaker Sir, I would like to bring to the notice of the Government another important matter. That is with regard to Shetan Talab. Sir, the Municipal Corporation of Hyderabad have constructed the said nala expending an amount of Rs.25 lakhs. But the said nala is not put to use. When myself and Sri T.Sitaram visited the said nala, the Hon'ble Minister was shocked by seeing the sight. Speaker Sir, all these things are important. If it is a natural disaster, we can understand. But there are certain man made problems. We must all look into them. We are all responsible for them. I request the Government to look into the matter immediately. Speaker Sir, certain things do not require additional money. Right decisions taken at right time will help a lot. Speaker Sir, this problem could have been averted.

SRI ASADUDDIN OWAISI: Speaker Sir, right from Wednesday night, we along with 300 party workers are working in the Karvan area and also we have set up medical camps in our Constituencies. I would like to know from the Hon'ble Chief Minister If this is not positive, then what is
positive? Speaker Sir, I can speak on behalf of my Party. I can say, 'yes, we are positive.' Everybody is aware of the extent of damage caused due to heavy rains and floods. We know the extent of destruction caused. The other day, in the All Party Meeting when I brought one issue to the notice of the Hon'ble Chief Minister, he talked with the Police officials and by taking timely action, more than 30 lives were saved. I am thankful to him.

With regard to wearing of black badges, Speaker Sir, two things go hand in hand. As the Government had increased power tariff exorbitantly, which is nothing but a disaster to the people, and in order to bring the matter to the notice of the Government, we are wearing black badges and we continue to wear black badges.
SRI ASADUDDIN OWAISI: Speaker Sir, we have Democracy. In a Democracy, everyone has a right to protest and the protest is being undertaken because of the hike in the power tariff. Speaker Sir, this is a heavy burden on the people. Disaster has already stuck us in the form of hike in the power tariff affecting the livelihood of the people. As if the said disaster was not enough, another disaster in the form of heavy rains and floods occurred resulting in heavy loss in terms of human life and property. Sir, I humbly request the Hon'ble Chief Minister to withdraw their support to the BJP Party. Then they can see the change in our approach towards them. We now call them Ex-friends. If they withdraw support to the BJP party then they can see our approach towards them. Speaker Sir, the hike in power tariff has destroyed the livelihood of many a people. The ball is now in the court of the Chief Minister. Our stand is very clear with regard to the havoc caused due to heavy rains and floods. We have 24 Cms. of rainfall in one day. Speaker Sir, right from Wednesday night our Party Members and party workers are working day and night. We are here to cooperate with the Government as far as the relief measures are concerned.

1.1. The second section:

The second section follows the first section in a logical order, providing additional details and context. It may include new information or expand on the themes introduced earlier. The text likely explores specific examples, case studies, or further elaborations on the topics discussed in the first section.

This section continues to build on the narrative, ensuring a cohesive flow of ideas and arguments. It may also contain a conclusion or a summary of the key points discussed in the first section, setting up the stage for future sections or discussions.

1.3. **Problem Statement:**

A factory produces two types of products, X and Y, in various quantities. The production of product X requires 2 hours of machine time, while the production of product Y requires 3 hours of machine time. The production of each unit of product X contributes $150 to the revenue, and the production of each unit of product Y contributes $200 to the revenue. The factory has a total of 120 hours of machine time available per week. The goal is to maximize the revenue generated by the factory.

Formulate and solve the linear programming problem to determine the optimal production quantities of products X and Y.
