clean and green

1. Water is an essential resource that nourishes all living beings. Water is the building block of life itself. An unrestricted and proper supply of water is crucial for the sustenance of life in any environment. Therefore, the importance of clean water cannot be overstated. A major portion of the world's population is依赖于水 resources. Without clean water, the health of the planet and its inhabitants is at risk. Water is also essential for various industrial purposes and for maintaining the proper functioning of ecosystems. Without water, the earth's biodiversity would drastically reduce. It is essential to ensure that all communities have access to clean and safe drinking water. Groundwater is a vital resource for many communities in the world. It is the source of water for many rural areas and is used for irrigation, industrial purposes, and domestic needs. However, the excessive extraction of groundwater can lead to depletion and contamination, which can have severe long-term effects on the environment and human health. Therefore, it is crucial to regulate the use of groundwater and implement measures to ensure its sustainability. The importance of groundwater cannot be overstated, and it is critical to conserve this resource to ensure the survival of future generations.

2. Green energy is the future of sustainable development. The importance of clean energy cannot be overstated. It is essential to shift away from the use of fossil fuels and towards renewable energy sources. The use of fossil fuels has caused significant environmental damage and has contributed to climate change. The transition to clean energy sources can help reduce greenhouse gas emissions and combat climate change. The use of solar, wind, and hydroelectric power can provide a reliable and sustainable source of energy. However, the transition to clean energy requires significant investment and infrastructure development. It is essential to support the development of clean energy technologies and ensure that this transition is equitable and accessible to all communities. The importance of clean energy cannot be overstated, and it is crucial to prioritize the development of clean energy technologies to ensure a sustainable future for all.

Suicide is not a permanent solution for a temporary problem.
This has become a lucrative business. Within no time, they are earning crores. Within no time, buildings are coming up. Within no time, they are becoming empires. SRI KARANAM RAMACHANDRA RAO: No.

CHAIRMAN: Let us not go back.
These things are not coming to light for the simple reason
because the Management is very strong. For example, Shanta Reddy, Member, National Commission for Women has given a suggestion. I request the Government to appoint a House Committee. I also request the Government to look into all the aspects of the educational functioning of the private colleges.
Is the Government accepting for a judicial enquiry or not. Let them tell.

DR.K.LAKSHMAN: Every year, it will repeat. It will go on.

Similarly, in the larger interests of the State, let them tell.
That will be more effective and involvement of everybody will be there. In the larger interest of the State take the advice of the House.

CHAIRMAN: The data is already here. Only corrective action has to be taken and that is what the Hon'ble Minister is proposing to take.

SRI D. SRINIVAS: What I am trying to tell you is something. In fact, he should welcome the suggestion.
CHAIRMAN: The House is adjourned for ten minutes for Tea.

(The House then adjourned at 12.37 P.M for Tea break.)

MADAM SPEAKER: First matter of urgent public importance under rule 74 regarding construction of Totapalli, Janjavathi, Vegavathi and Tarakaramasagaram Projects in the State is postponed.

Now second matter of urgent public importance regarding allowing the students of the Soldier Scholar’s College of Education for B.Ed. Examination.
Government was kind enough to issue orders to admit these boys in three Colleges. The National Council of Teachers' Education, the apex body of teachers' education in India visited the three Colleges and having satisfied with all the norms understood the injustice meted out to the students, permitted for a crash course of B.Ed.

Based on the report of the Colleges, Government have addressed the Osmania University to permit the students to appear for February, 2001 Examination. The National Council for Teachers' Education having satisfied themselves only gave orders to complete the syllabus.

We were not allowed to see him. We have also represented to the Ministers. They have also satisfied themselves.

We have also represented to the Ministers. They have also satisfied themselves.
that the students could write the B.Ed. Examinations. The Hon'ble Chief Minister was kind enough to issue the G.O. to admit these boys and allotted to various Colleges. He has refused to see the MLAs. This is the sorry state of affairs. This is not first time. We wanted to discuss the students problem. The University has not cared us. They have not given interview also. We are strongly protesting. The Government should enquire into the matter and take action against the V.C., who is behaving like a dictator.

SRI KADIAM SRIHARI: The University authorities will be directed by the Government to conduct the examinations for these B.Ed. students if they satisfy all the N.C.T.E. guidelines. If at all they are going to satisfy the guidelines the term will be extended by one more month. The total instruction will be completed and practicals will be completed. Special examination schedule will be
announced by the University and they will be announced by the University. At any cost the students will not be subjected to any type of harassment. Government will definitely take care of the interests of the students.
DR. N. JANARDHAN REDDY: The entire country is one zone. 

SRI ASADUDDIN OWAISI: The Chief Minister will reply, the Hon’ble Member is not yielding.

The Hon’ble Member is not yielding.
President Clinton stated that Information Technology is good but minus rural development, it will be of no use.
Who is making a note of it? Somebody should make a note of it. We want all this to be reflected in CM's reply.

They feel proud of themselves about it.

That is a mother of six other units.
Comment [R7]: ts/mmg
That is a social obligation. This country is committed to that constitutionally or otherwise also.
The Government has never said that we constitute Regional Development Boards.
