Exemption of weavers from taxes.

286—

* 520 Q.—Sri S. NARAYANAPPA:—Will the Hon.
the Minister for Local Administration and Prohibition be
pleased to state:

(a) whether the Government have received any
representation requesting them to issue necessary instructions
to the local bodies permitting them to exempt the weavers
from the taxes; and

(b) if so, the action taken thereon?

THE HON. SRI A. B. NAGESWARA RAO:—

(a) and (b) The Government did not receive
representation from The Andhra State Handloom Weavers'
Congress about the distress among the Handloom Weavers in
October 1953. In view of reports of widespread distress
reaching the Government, the Government advised local bodies
in December 1953, to exempt handloom weavers from the
payment of property tax, house tax and profession tax for
the year 1953-54 only in cases where the executive authorities
are satisfied that the particular weaver's economic condition
was such as to justify exemption from the payment of these
taxes. This exemption was not applicable to all weavers or
to the weavers who had taken to profitable forms of handloom
industry such as carpet-making or to the weavers who were
dealing in prosperous items of handloom trade. No represen-
tation from weavers has been received by Government for
issue of such a direction to local bodies for subsequent years.

Agricultural farms are an integral part of agricultural development in rural areas. They are essential for the growth and prosperity of our farming community. The Agricultural Department has been instrumental in establishing and maintaining these farms. The department has a total of 100 acres of land dedicated to agricultural farms. Among the various farms, there are also research stations where experiments are conducted to improve agricultural techniques and practices.

The department has a strong team of agricultural demonstrators and researchers who work tirelessly to ensure the farms are well-maintained and productive. The department also provides training on various agricultural practices to the farmers.

The budget for the year 1955-56 includes a significant amount for the Agricultural Department. The department has been allocated Rs. 2,00,000 for the development of the farms. This includes the costs for the maintenance of the farms, acquisition of new land, and the purchase of necessary equipment.

The agricultural farms play a crucial role in the development of rural areas. They are a source of income for the farmers and provide employment opportunities.

The department has also been allocated Rs. 1,00,000 for the construction of new research stations. These stations will be used for conducting experiments and research on new agricultural techniques.

In conclusion, the Agricultural Department has been allocated a substantial amount of funds in the budget for the year 1955-56. These funds will be used to enhance the productivity of the farms and the research stations. The department is committed to ensuring the growth and development of the farming community.

Hire purchase system 1% of the hire purchase value 

Sri D. Sreeramamurthi:—

Hire purchase system is a scheme where the purchase of equipment is funded through instalments. It is a popular method for farmers to acquire modern agricultural equipment that they may not have the immediate financial capability to purchase. The 1% of the hire purchase value can be considered a small investment that balances the cost of the equipment with the financial capacity of the farmer. This system allows for gradual payment of the total cost, making it easier for farmers to manage the expenses. It is beneficial as it promotes the use of advanced agricultural tools and techniques, leading to increased productivity and efficiency in farming.

Demand XVIII Agriculture & Fisheries

The Hon. Sri B. Gopala Reddi:—Recently, we discussed the demand for local coolies and the proposal to establish departments to specialise in fisheries. In the fisheries department, we propose to introduce the technology of deep sea fishing, which will be a major source of income. This will not only increase our foreign exchange earnings but will also provide employment opportunities for the fishermen. Therefore, I move that the demand for the fisheries department be increased by 10, 15 lakhs. Thank you.

P. B. Satyanarayana concluding remarks:—I would like to highlight the importance of agriculture in our country. It is the backbone of our economy, providing employment to millions of people. The demand for grants for agriculture is crucial to ensure food security and to bring about technological advancements in the sector. I move for an increase in the demand for agriculture and rural development by 15 lakhs.

The Hon. Sri B. Gopala Reddi:—I appreciate the Honorable Member's point on the importance of agriculture. However, I would like to focus on the fisheries sector. The demand for grants for fisheries needs to be increased to support the development of deep sea fishing technology, which has the potential to generate significant income and employment opportunities.

P. B. Satyanarayana concluding remarks:—I would like to conclude by thanking all members for their contributions. The demands for grants for agriculture and fisheries are essential for the development of our country. I urge all members to support these demands to ensure a brighter future for our nation.

In the meeting of the House on the 26th July 1955, the demands for grants under the Ministry of Agriculture & Fisheries for the year 1955-56 were taken up for consideration.

The Hon'ble Minister for Agriculture & Fisheries, Shri B. Gopala Reddi, presented the budget for the year 1955-56. He stated that the budget for the Ministry was designed to meet the needs of the department and to facilitate the development of agriculture and fisheries in the state.

He further mentioned that the budget was to be met from various sources of revenue, including taxes and duties, and that the government was committed to ensuring that the budget was utilised effectively to benefit the farmers and fishermen of the state.

The Minister also highlighted the importance of providing adequate funding for research and development in the field of agriculture and fisheries, and he assured the House that the government would ensure that the necessary resources were made available for this purpose.

In conclusion, the Minister thanked the House for its support and commitment to the development of agriculture and fisheries in the state, and he expressed confidence that the budget for the year 1955-56 would lead to significant progress in these fields.

The House was adjourned.

The Hon. Dr. S. V. Aswathnarayana, Chairman, Government of India. I am pleased to operate in your presence, Sir, to reveal the last request of my wish for a grant for the Agricultural College. There are 80 applications for 1955-6, 47 of which are for 1954-55. The demand for the Agricultural College is Rs. 46.47, which is Rs. 45.47 less than the previous year. This decrease is due to the withdrawal of Government of India's grant for the export license of fruit research station. If the demand for the Agricultural College is increased by Rs. 45.47, the Government of India will correspond with the demand.

The Agricultural College spends Rs. 46.47 on applications for the information of the College, and Rs. 45.47 less than the previous year. This decrease is due to the withdrawal of Government of India's grant for the export license of fruit research station. If the demand for the Agricultural College is increased by Rs. 45.47, the Government of India will correspond with the demand.

Srimathi C. AMMANNA RAJA :—

Mr. SPEAKER :—

Mr. SPEAKER :—

Mr. SPEAKER :—

Mr. SPEAKER :—

Mr. SPEAKER :—

Sri S. RANGANATHA MUDALIAR : Mr. Speaker, Sir, my object in speaking on this Demand is to request the Hon. Chief Minister to focus his attention on the kind of administration that obtains in my district with respect to the Forest Department. I have said in my cut motion, or rather I have characterised it as mal administration.

Mr. SPEAKER : That motion is not before the House.

Sri S. RANGANATHA MUDALIAR : But I would just dwell on that point.

Mr. SPEAKER : Yes, you may do that.

Sri S. RANGANATHA MUDALIAR : Chittoor district is one of the backward districts in this State, and the only natural wealth of the district is forest. It being also the
driest district in the State the importance of rainfall and the importance of forests in relation to rainfall is indisputable. In these circumstances the conservancy on which so much money is expended by this Government is most uneconomical, if not, waste, so far as forests in Chittoor district or at any rate the western taluks of Chittoor district is concerned. When I say Chittoor district I do not mean either Mamandur forest or the other ranges in Chandragiri taluk, of which I know nothing. There is a huge establishment in our district. The department is manned by two District Forest Officers; one of whom is a superannuated officer, re-employed, and the other gentleman is too young to be a district officer; I am not saying too young to realise the responsibility of his office.

The Hon. Sri KALA VENKATA RAO: One makes the deficiency of the other.

Sri S. RANGANATHA MUDALIAR: I think, one cancels the other, with the result that there is absolutely no administration. Under them work one or two extra conservators, and there is a battalion of forest rangers and foresters and an army of subordinate forest menials. In spite of this huge establishment, what we see is a sad picture of progressive deterioration of administration as evidenced by indiscriminate and illicit felling of forest trees, which is increasing on a wider scale day by day with impunity. If conservancy includes regeneration and replacement of exploited areas and the maintenance of forest in a state of efficiency, such conservancy is absolutely wanting in my district.

Chittoor reserves have been famous for its red saunders. Formerly these red saunders were carefully conserved and quickly replaced, when mature trees were extracted. Such trees are now allowed to be lopped and cut down and sawed and transported in broad daylight without any notice and with impunity. Regions which are affected by this sort of depredation are areas within five miles from any town
The offenders are not limited to the poorest classes who live by selling of firewood only. The offenders belong to the various labour classes in the town. They have found poaching a very fruitful source of income; and the worst offenders in this respect are the policemen and the fire service men. The Policemen particularly belong to the armed reserve, and they along with the fire service men have been responsible for reckless denudation of the reserves close to Chittoor town. There are cases where policemen either on off-duty or in duty have committed this offence and they have been reported. But no notice was taken by the District Superintendent of Police. They want us to catch the offenders and take them red-handed—which is an impossibility. They resent when anything is said against their department subordinates. But the fact is, police officers, I mean, police constables and head constables, go as far as Palmaner, and by mere zulum get illicit green wood cut and get it transported on bus tops. This is almost a daily occurrence. These depredations have been noticed by no less a person than the Collector of the district himself. Mr. Yaganti had seen these things personally, and in spite of the trouble taken by him to rouse the district officers to a sense of duty, his efforts have proved a failure, and he confessed that it was a hopeless task to mend them.

Sir, I and my advocate friends are in the habit of going on evening rambles, and we have been helpless spectators of these ravages; helpless, because we were often times defied by these offenders when we questioned them. The most wonderful thing is during all our rambles during all these years and months we have yet to come across a forest subordinate or a forest officer of any rank to come into this area, at least for pleasure of walking. The forest officers bungalow is within a shouting distance from the reserves. More often he is found in the Recreation Club in the evenings. If he is in the headquarters, he is in the Officers' Club in the evenings. If he is not in the Officers' Club, we must take it
he is somewhere touring; he is not doing his duty in Chittoor; he is somewhere else. That is what I want to submit.

Chittoor is noted for its round roads and the Chittoor reserve forests have been beauty spots for a long time, and the round roads are beautiful amenities; and it is one of the items marked out with pride by Chittoor people for visits and for being shown round to provincial Governors. My complaint is neither during the time of the composite State nor afterwards — neither Sri Sri Prakasa nor Mr. Trivedi — was taken round these 'round roads'. If only the Governors had been taken there, care would have been taken to repair those roads, and the Governor himself would have had an opportunity of seeing the depredation going on with such reckless impunity. These roads were laid by a benevolent Collector Mr. Whitehead as early as the sixties of the last century. Now they are in utter desolation; they are in absolutely utter ruin. Those roads have been maintained hitherto partly by the Government and partly from contribution from the district board and the municipality. Now nobody takes any pains to keep those roads in good condition. Not that the district board and the municipality are not willing to give their contribution, but the officers do not care for these roads; there is nobody to ask these local bodies for their contributions, with the result that the round roads have gone to ruin irremediably.

Another curse of Chittoor district is charcoal burning. It has been responsible for licence ravage. It is high time for the Government to put a ban, a severe ban, upon the export of charcoal from Chittoor and the burning of charcoal in any part of the Government forest or in land or forest privately owned. We don’t care if Madras or any other State does not get fuel supply. The other States will take care of themselves, and it is for us to see that the forests are conserved, and the welfare of this State is the prime consideration and first consideration.
Then, lastly, I come to the state of affairs in the zamindari forests, which have been recently taken over by Government. These zamindari ryots were enjoying certain timehonoured rights of green manure and firewood and wood for agricultural implements under a free permit system. They had also a 'Mafi' system, that is to say, they were grazing cattle under Mafi permits, or permits given at favourable rents. These ryots now find themselves suddenly deprived of these rights and they are not able to take even firewood for their own domestic purposes; and so far as the administration of forests is concerned, it is a series of prosecutions of poor ryots, which is nothing but unrelieved persecution. This is a matter in which the Government should take immediate steps to redress the grievances of the ryots, if the object of the Government is to ensure happiness and contentment of the people of the State.

As regards denudation going on, we see side by side with this denudation, Vanamahotsavam being performed with much enthusiasm. It is a mockery; it is nothing but mockery. Therefore, let us for some time stop this Vanamahotsavam business and devote our attention to planting of trees wherever old trees, primaeval trees and gigantic trees have been removed and destroyed by the vandalism of offenders, who have been doing such things with impunity.

Chittoor reserves are very favourable for (and it has a good soil for) the cultivation of bamboos. There was a time when the Chittoor reserves were famous for bamboos. Bamboo can be replanted and Government may also consider why casuarina cannot be planted in the place in forest area where old trees were felled and removed. Government must also take possession of river side porambokes and other lowlying land, shrubby lands lying on the outskirts of the reserve forest for casuarina plantation. That would in a way solve the firewood problem. With these words I close my observations.

PAPER PLACED ON THE TABLE OF THE HOUSE.

[Fide ANSWER TO LEGISLATIVE ASSEMBLY QUESTION NO. 436
[STARRED] BY SRI R. B. RAMAKRISHNA RAJU, M.L.A —page 150 SUPRA.

According to certain orders issued by the composite Madras State, the treatment of wells in estates taken over under the Abolition Act, is as follows:—

(1) poramboke wells having a regular ayacut of not less than 3 acres are classified as irrigation sources and their ayacuts registered as wet, with appropriate wet assessment, the usual baling remission being allowed;

(2) in the case of other wells in porambokes including those having an ayacut of less than 3 acres—

(a) the lands around them are treated as dry and appropriate water cess is charged for their irrigation from the wells; and

(b) if, in individual cases, the ryots are able to show that the wells are private wells, constructed prior to 20th August 1884, no water-cess is charged for the irrigation of dry lands from them; and

(3) the sites or ruined wells on porambokes are transferred to assessed dry and assigned by the Revenue Department.

These orders apply to the poramboke wells in the estate areas in the Chittoor district also.

A number of representations have been received by the Government against the orders referred to above and the matter is being examined by the Government. Pending final
decision on the question of treating these wells as Government irrigation sources or as private wells, the collection of water rate on lands irrigated by poramboke wells in all the estate villages in Puttur and Tiruttani taluks of Chittoor district taken over by the Government under the Abolition Act, has been postponed.
