*394 Q.—SRI S. VEMAYYA: Will the Hon. Minister for Revenue be pleased to state:

The reason for not having paid the jamabandi allowances to the village officers within a distance of 5 miles and below now?

THE HON. SRI K. CHANDRAMOULI:—

No jamabandi allowance is paid to village officers of villages within a radius of 5 miles from the jamabandi camp, as they would not ordinarily have to halt at night at the jamabandi camp and would not therefore have to incur any expenditure in connection with their journeys.

Mr. SPEAKER:—

Mr. SPEAKER:— The hon. Member Mr. Vavilarla Gopalakrishnayya has sent in a privilege motion which reads as follows:

"The Select Committee on the Madras Estates Land (Andhra Amendment) Bill, 1955, had remitted their report to the House in the late autumn. The report was tabled on 21st December, 1955. Since then, no action has been taken on the report. The Select Committee has been in existence for over a year and has failed to produce any results. The House has been denied the opportunity to discuss the report and to make any amendments. This is a clear case of a Select Committee failing to function properly."

III. PRIVILEGE MOTION re:

Mr. SPEAKER: The hon. Member Mr. Vavilarla Gopalakrishnayya has sent in a privilege motion which reads as follows:

"The Select Committee on the Madras Estates Land (Andhra Amendment) Bill, 1955, had remitted their report to the House in the late autumn. The report was tabled on 21st December, 1955. Since then, no action has been taken on the report. The Select Committee has been in existence for over a year and has failed to produce any results. The House has been denied the opportunity to discuss the report and to make any amendments. This is a clear case of a Select Committee failing to function properly."
I wish to point to Mr. Gopalakrishnayya the rule relating to this. Rule 92 says: "The report, the minutes of the proceedings of the Committee as approved by the person presiding and, if the Bill has been amended, the Bill as amended by the Committee, shall be printed and copies furnished to each member of the Assembly. The report, and if the Bill has been amended, the Bill as amended or such portion thereof as may have been amended shall also, unless otherwise directed by the Select Committee, be published in the Fort. St. George Gazette in the languages in which the original Bill was published."

Mr. VAVILALA GOPALAKRISHNAYYA: On a point of personal explanation, Sir.

Mr. SPEAKER: No explanation is necessary. I am explaining. The Select Committee in its report has stated: "The Committee decided that the Bill as re-drafted need not come before the Select Committee and authorized the Chairman to sign the report on behalf of the members and send it for publication so that it could be taken up in this session." Also, for the information of the hon. Member I may state that the publication in this case was made, not by the Committee or by the Government, but under the authority of the Legislature Secretariat. If the hon. Member sees the concerned Gazette, he will find the publication is made under the signature of the Secretary to the State Legislature. So, there is no breach of privilege in this case and I rule the motion out of order.

IV. MOTION UNDER RULE 11 OF THE ASSEMBLY RULES.

Sri M. SATYANARAYANA RAJU: Sir, I move:

"That under Rule 11 of the Assembly Rules leave of absence be granted by this House to Sri Gottumukkala Jagannadha Raju, Member, Andhra Legislative Assembly for his absence during the last session from 3—2—1956 and during the present meeting till 19th March, 1956."
MOTION UNDER RULE 11 OF THE ASSEMBLY RULES.

19th March 1956

Mr. SPEAKER: The question is, "That under Rule 11 of the Assembly Rules leave of absence be granted by this House to Sri Gottumukkala Jagannadha Raju, Member, Andhra Legislative Assembly for his absence during the last session from 3—2—1956 and during the present meeting till 19th March, 1956."

The motion was carried and leave was granted.

The Hon'ble Minister for Irrigation,

Sir,

I am to submit the following recommendations for the approval of the Government:

1. The schemes for irrigation are classified as minor, medium, and major schemes. The minor schemes are those with a capacity of less than 1,000 cusecs. Medium schemes are those with a capacity of 1,000 to 5,000 cusecs. Major schemes are those with a capacity of more than 5,000 cusecs.

2. The schemes are further classified into forecast schemes, medium flood control schemes, and minor schemes. Major schemes are designed to meet the needs of scarcity areas.

3. The estimated costs for minor schemes are Rs. 2,000 per cusec, for medium schemes Rs. 3,000 per cusec, and for major schemes Rs. 5,000 per cusec.

4. The Chief Engineer and Secretariat are responsible for preparing the plans, estimates, and reports.

I request your approval for the following:

- Minor schemes
- Medium flood control schemes
- Major schemes

Please find attached the detailed estimates and plans for your perusal.

Yours faithfully,

The Department of Irrigation has estimated the requirements for the above schemes, which include the construction of bridges, roads, and other infrastructure. The budget estimates have been revised to reflect the current needs, and the estimates are expected to promote the development of the region. The Chief Engineer and the technical staff have reviewed the estimates and revised them accordingly. The Finance Secretariat and the Public Works Department have also contributed to the revision process. The revised estimates are now ready for approval.

The Hon'ble Finance Minister, Government of Madras:

Sir,

I am directing your attention to the statements which I have made in the course of the debate on the estimates for irrigation and river development. These statements were the lines along which I intended to develop my arguments, if the occasion should arise, and I was waiting for an opportunity to present these to you. In this connection, I wish to draw your attention to the following points:

1. **Short Range Schemes**: I have pointed out that the present capital outlay on irrigation schemes (short range schemes) is less than one-third of the capital outlay on river development schemes. This suggests that the government is more concerned with the long-term benefits of river development than with the immediate needs of irrigation.

2. **High Level Channel**: It is necessary to construct high level channels to ensure a steady supply of water for irrigation purposes. This is especially important in areas where the water table is low and the irrigation channels are subject to siltation.

3. **Minor Irrigation**: I have also emphasized the need for minor irrigation schemes to provide water for small landholdings. This is particularly important in rural areas where large scale irrigation is not feasible.

Yours sincerely,

Sri G. Suryanarayana:—According to a report in the minor, major irrigation schemes, the farmers are assured of irrigation water. Therefore, the farmers have been able to make better use of the land and increase their produce. This has resulted in an increase in the food supply in the state. The government has also been able to save a large amount of money by not having to import food from other countries.

1951 and 1952 were drought years. However, the government was able to cope with the situation by using the irrigation facilities available. The government also took steps to increase the productivity of the land by conducting various experiments in agriculture. These efforts have paid off as the state is now self-sufficient in food production. The government is now planning to expand the irrigation facilities to cover more land. This will help to increase the production of food crops and improve the living standards of the farmers.

Sri B. RAMA REDDI:—
In connection with the Irrigation schemes, the government has approved the demand no. VIII, XXVIII, XXXIV and XXXVIII. These schemes are expected to bring about the desired results.

From the government's point of view, these schemes are considered as remunerative. However, from the engineering department's perspective, the schemes may not be as remunerative as expected.

It is important to note that the government has given due consideration to the engineering department's assessment. The schemes have been approved after careful consideration and analysis.

In conclusion, the government is committed to ensuring that these schemes are implemented effectively and efficiently. The engineering department is being closely monitored to ensure that the schemes meet the required standards and specifications.

2.4 return duty on existing line of water supply as 10% on estimated expenditure. A detailed investigation has been made to determine the economic viability of the scheme. It has been found that the scheme is economically viable and will fetch a good return. The Chief Engineer has prepared a detailed investigation report which has been submitted to the Government. The report shows that the scheme will be self-sustaining and will require no additional expenditure.

Sri B. APPA RAO—In his budget speech of 1955, the Chief Minister of the State announced a comprehensive irrigation plan. It was decided to construct a major irrigation project in the State to meet the increasing demand for water. The project was to be implemented in phases over a period of five years. The Chief Engineer has been ordered to carry out the detailed investigation of the project.

Minor irrigation projects will also be implemented in the State. The Chief Engineer has been instructed to prepare a detailed investigation report for these projects. The report will be submitted to the Government for approval.

The irrigation projects will be financed through a combination of central and state funds. The State Government will provide the necessary funds for the projects. The central government will provide assistance in the form of grants-in-aid.

The irrigation projects will be implemented in a phased manner. The first phase will involve the construction of minor irrigation projects. The second phase will involve the construction of major irrigation projects. The third phase will involve the development of multipurpose river schemes.

The irrigation projects will be implemented in a way that they are self-sustaining. The Chief Engineer has been instructed to ensure that the projects are economically viable.

The irrigation projects will also be implemented in a way that they are environmentally friendly. The Chief Engineer has been instructed to ensure that the projects do not cause any environmental damage.

The irrigation projects will be implemented in a way that they benefit the rural population. The Chief Engineer has been instructed to ensure that the projects provide water to the rural areas.

The irrigation projects will be implemented in a way that they are socially acceptable. The Chief Engineer has been instructed to ensure that the projects are accepted by the rural population.

The irrigation projects will be implemented in a way that they are technologically advanced. The Chief Engineer has been instructed to ensure that the projects are equipped with the latest technology.

The irrigation projects will be implemented in a way that they are cost-effective. The Chief Engineer has been instructed to ensure that the projects are implemented within the estimated cost.

In view of the increasing demand for irrigation, particularly for the large tracts of barren land, it is necessary to accelerate the execution of projects and make a realistic assessment of the total area to be covered by the schemes. The irrigation projects should be planned in such a way that they complement each other and provide a balanced development of the land. The government should provide adequate funds for the execution of these projects.

Flood Control Schemes:

Preliminary work on the investigation and planning of the flood control schemes should be carried out immediately. The reservoirs should be investigated to determine their capacity and the immediate sanction should be given. The reservoirs should be constructed in such a way that they provide flood control and irrigation.

A comprehensive scheme should provide for flood control, irrigation, and flood control schemes. Detailed investigation should be carried out to determine the feasibility and cost of the projects.
