(b) if not the reasons for withdrawal of Land Acquisition proceedings in G.O. Rt. No. 228, Education and Endowments, dated 20th March 1956?

(a) The answer is in the negative.

(b) The proposal was first initiated to provide a path-way in B.S. No. 115/1 along with proceedings for acquisition of land for house sites in B.S. No. 150-1,2 and 149 of Vuyyuru village but in view of the high cost involved in the acquisition of land for house sites the proposals were dropped. As there is no need to acquire land for a path-way without providing house sites, the acquisition proceedings, were withdrawn in G.O. Rt. No. 228 Education Endowments dated 20-3-1956.

(a) The answer is in the negative.

Landless Poor Workers Co-operative Society of Nagullanka, hamlet of Manepalli registered on 2-10-1955 with 17 members of whom a majority are having their own lands and tobacco business?

THE HON. SRI K. CHANDRAMOULI:—

(a) The lanka land referred to by the Member is presumably the Vynateym Godawarilanka measuring Ac. 86.93 in R.S No. 332 of Manepalli village in Razole Taluk. This lanka was under the lease of the Adi-Andhra F.L.C. Society Manepalli village from F. 1949. In F 1365 it was withdrawn from the society as it failed to pay the arrears due from it for F. 1364 completely in time.

(b) The Lanka so withdrawn from the Adi Andhra Society was available for disposal under the rules governing lanka leases. No other society except the Nagullanka landless Field Labour Co-operative Society applied for its lease for F. 1365. Since this Society was eligible for grant of lanka leases and was also willing to take up the lanka agreeing to pay the rentals fixed under rules, it was leased out to it for that Fasli. The allegation that a majority of the members of this Society are not landless poor persons is not correct.

May I know Sir, if advance intimation is not sent to the concerned Ministers that a particular question will be taken up in the House on a particular day and, if so, is it not necessary, Sir, that the concerned Minister should at least make alternate arrangement to see that the questions are properly answered and if it is not possible for them to do so for any unavoidable circumstances, is it not proper that they should take the permission of the Speaker?

THE HON. Dr. B. GOPALA REDDI:—Hon. Speaker's permission has been taken, and if it is the wish of the hon. Member that other Ministers should answer the absentee Ministers' questions, we have no objection. But you may not get the full information when you put supplementary questions. So, in order to facilitate your convenience, we are trying to postpone those questions so that they may be duly answered when the concerned Minister is present in the House.

MR. SPEAKER:—We will try to minimise this as far as possible.

SRI B. V. SUBBA REDDI:—Mr. Speaker, Sir, while I am very glad to support the motion before the House of offering thanks to the Governor for the lucid, forciful and effective way it was delivered to this House I am unable to agree with most of the things that are stated in the address. Sir, as all the hon. Members are aware, though the Governor’s address is purely a formal affair still it becomes important as reflecting the policy and programme which the Government intend pursuing in the near future. Sir, the Governor’s address reads like the lullaby of a mother rocking a child to sleep, and it left every member of this House in a stupor and in a feeling of drowsiness. Sir, the address is a comprehensive resume of all that has been achieved by the present Government ever since the inception of the Andhra State in October 1953, and particularly in the previous year and states what the Government propose to do in the near future during the period of the Second Five Year Plan. Sir, I am fully alive and conscious of the several handicaps and
DISCUSSION ON THE GOVERNOR'S ADDRESS

11th August 1956

difficulties of the Government. I am also alive to the prevailing circumstances at the present time. I am also conscious of the vastness and complexity of the problems facing Government, and with the full responsibility that I owe to this House and the people at large I wish to make a few observations.

Sir, I do not wish to waste the precious time of the House by referring seriatum to the several subjects dealt with in the address. I only wish to confine myself to the programme and policy of the Government and the administration in general.

Sir, judged by the standard which you people (addressing the Treasury Benches have set before yourselves, judged by the several promises which you people made in your speeches to the electorate and in your election manifesto and judged by the socialistic pattern of society which you people have set before yourselves judging most liberally and very leniently I am constrained to observe that your performance is very poor, if not miserable, and all your performance pale into insignificance viewed in the light of all the extravagant promises which you have made to the electorate.

THE HON DR. B. GOPALA REDDI:— You address the Chair, speak in the third person; otherwise 'you' will mean the Speaker. (Laughter)

MR. SPEAKER:—Please carry on.

SRI. B. V. SUBBA REEDI:—Sir, I ask the Government: What have you done to improve the lot of the common man? As I have just now stated, your ultimate goal is the establishment of a socialistic pattern of society. But you have not so far defined what it means. One leader defines it in one way, another leader defines it in another way; and each leader defines it in his own way and according to his own convenience.
While one leader would have it as reducing the gulf between the lowest income man and the highest income man, another leader would have it as increasing the standard of living of the common man. Whatever that may be, Sir, the common man in the street feels that with the advent of the socialistic pattern of society he is going to live free from want and suffering, in a state in which he can keep his body and soul together. Sir, I ask, what is it the Government have actually done to improve the lot of the common man economically? Sir, while it is true that that the Government have laid a road here and a road there, constructed a school building here and dug a well there, I am sorry to say that what they have done is very poor. While it is true that they have spent vast sums of money for improving towns and cities—perhaps to impress the foreign tourists who frequently visit these places, what is it they have done to improve villages? You go to the villages, and what is the spectacle you see there? Squalor, wretchedness, misery, disease and hunger. These are still, widespread and rampant and are eating into the very vitals of the human beings there. Sir, while what has been done is practically precious little and negligible, the common man is not able to feel the difference between the previous British Government and the present Government. Sir, you have only to visit the village to be convinced of what I am saying here to-day.

Now, Sir, I go to the subject of administration in general. I hope I am not far wrong if I say that the Britisher bequeathed to us a sound and efficient administration, if not anything else. But to-day you see a feeling of laxity, a feeling of looseness has crept into the system of administration and the evils of corruption, nepotism and leakage of public funds in public works—all these still prevail and are on the increase. I am sorry to say that the condition is not much
better now than what it was prevailing during the British regime. While it is true that Man has made vast strides in conquering Nature, particularly in inventing destructive weapons which will devastate and extinguish humanity in the twinkling of an eye, still any student of human nature can easily see that there is now degeneration, deterioration and degradation common in every walk of life. Sir, while we may be feeling proud for having abolished exploitation by zamindars and princes, you have let loose on society an army of parasites who are to-day exploiting people in all ways and that too unconsciously and unknowingly. Sir, I am not referring to one particular class. There are hundreds and millions of people in all the parties, and that is the state to which we have been reduced at the present time.

Sir, while there might be many reasons for this state of affairs, mainly the blame rests on the Government which is torn asunder with groups and rival parties for power. It is true that ever since the dawn of humanitv, power, wealth and glory have been the ambition of every human being. But, at least in the past people had some regard for the means to achieve these ends, whereas today people have absolutely no regard for the means and they want to achieve these ends at any cost by foul or fair methods. Sir, if we are not alive to all these realities, I am afraid that the gathering storm and catastrophe towards which we seem to be moving, will certainly overtake us much sooner than we expect and inspite of all the Herculean efforts of leaders like Pandit Nehru it cannot be avoided.

Lastly, Sir, I would only refer to a few of the items to which a number of hon. Members have given expression. As Mr. T. Ramachandra Reddi said yesterday, I must congratulate him for his plain speaking, so far as land reforms are concerned, I feel we should not bypass it. It is
better they are decided soon one way or the other. So far as the administration of district boards and the special officers' regime are concerned, it is a very sad commentary and the least said about it the better.

And so far as the taxation measures are concerned, they are causing very severe headache to everybody and particularly to the agriculturist. I would only advise the Government to devise some permanent measure of taxation and be done with it at least for some years to come. Sir, I might tell the Government that this kind of dilly-dallying and shilly-shallying way of doing things does no fair to the Government nor good to the people at large. Sir, Government should rise to great heights both intellectually and morally and act boldly and fearlessly. I hope, very piously hope, that in the new state of things which we are going to get, we will have certainly a Government which can act boldly and fearlessly and do something to improve the lot of the common man. Thank you Sir.

SRI K. V. RAMANAYYA NAIDU:— Mr. Speaker, Sir, I am glad to support the motion moved by Sri K. V. Vema Reddi thanking the Governor for the address given by him. Though he is considered to be a titular head, still I am glad he has taken real and keen interest in every branch of administration of this State. And I think our Government and our Ministers must feel thankful to him for what he has done and what he is trying to do. The Governor was pleased to mention very clearly what has been achieved by this Government after the attainment of a separate State. He has also envisaged what is likely to be done in the very near future. Even though he has mentioned certain important things, my feeling is that it does not go far enough. There are many things which have been omitted to which I would like to make a reference.
Now, certain new railway lines are going to be taken up in our State and no specific mention is made about this in the Governor's address. With reference to Krishna district in particular, it is proposed, as has already been announced by the General Manager of the South Indian Railway and the Superintendent at Bezwada, to extend the mixed gauge up to Gudivada. I know, Sir, that our Government has recommended to the Railway Board and to the Central Government that the mixed gauge should be between Guntur and Masulipatam and we thought that it would be taken up as a single unit. But now, we find that it is not going to be taken up as a single unit for the time being and that the mixed gauge will be only up to Gudivada. My point is this. Krishna district is considered to be one of the granary districts of our State, if not of the whole of India. Because of this particular difficulty of metre-gauge, the ryots of Krishna district have been suffering all these years. Their produce has to be exported to outside districts and to other States. In particular, most of the surplus paddy and rice of Krishna is being exported to Malabar which is on the broad gauge. The people and especially merchants are anxious to export their produce to Malabar. But the railway line connecting Krishna district with the main line is of metre gauge. So merchants find it very difficult and costly to purchase their requirements from rice centres on the metre gauge. For this reason they always prefer to purchase their stocks from Tenali, Vijayawada or Tadepalligudem in West Godavari district, because if paddy is purchased at Gudivada or Gudlavalleru or Masulipatam, they have to tranship it at Tadepalli into broad gauge and this transhipment entails great trouble, wastage of material, leakages and pilferages. In order to avoid all these difficulties, the merchants prefer to confine their purchases at places on the broad gauge only.
DISCUSSION ON THE GOVERNOR'S ADDRESS

11th August 1956]

There is another reason also. In two months' time the Telangana area is going to be merged with our State and our State then would be one of the big States, if not the biggest. Telangana area also is a deficit area and the surplus produce in Krishna district has to be taken to Hyderabad. When the Nizam was in power, he was entitled under a treaty with the British Government to have goods delivered at Masulipatam port free of excise duties and he tried his level best to secure the port of Masulipatam for himself, to facilitate import of goods from foreign countries to Hyderabad direct. He fought the matter out even up to the parliament of England and the English Government did not yield. Then he asked for a corridor or at least for a separate broad gauge railway line up to Masulipatam. That was also denied by the British Government. Now, Hyderabad and Andhra are going to be one State and we will have plenty of mineral resources and they will have to be exported to foreign countries only through the port of Masulipatam which is the nearest port to Hyderabad. Therefore, for these reasons if the line from Masulipatam to Bezwada is not converted into a mixed gauge, there will continue this difficulty of transhipment which would involve additional expenditure and labour. I know that our Government has suggested to the Union Government that there should be a mixed gauge between Guntur and Masulipatam. But that is not going to be done now. This morning I had a discussion with the Planning Minister, Sri Kala Venkata Rao, and he told me that the question of mixed gauge between Guntur and Masulipatam is not given up. The line between Gudivada and Bhimavaram is going to be converted into broad gauge. That being the case, I do not know why the line up to Masulipatam, which is the district head-quarters, should not be converted into broad gauge. Of the two important minor ports of Andhra, Masulipatam is one, the other being Kakinada and there is no scope for the development of Masulipatam port
DISCUSSION ON THE GOVERNOR’S ADDRESS
11th August 1956

if the railway line is not converted into broad guage. Also Masulipatam port is very convenient for Rayalaseema people and it is going to be of greater use to the present Hyderabad area. Taking all these into consideration, I feel it is the duty of our Government to see that the mixed guage is extended up to Masulipatam. Otherwise, if we want to go to Hyderabad, we will have to get down at Gudivada or Bezwada and get into another train and that would involve lot of inconvenience to the people. So I request the Government, and particularly the Hon. Chief Minister, to take up the matter with the Government of India and see that the mixed guage is extended right up to Masulipatam port. This will also improve the port and facilitate export of the mineral wealth of Hyderabad.

Then, Sir, Masulipatam is also the headquarters of Krishna district. The district headquarters hospital is in a dilapidated and antediluvian state. It has been there for the last 400 years and every year the P. W. D. authorities repair it but they could not stop the leakage. Whenever there is rain, there is leakage and patients are shifted from place to place. I think the Hon. Chief Minister is also fully aware of the condition of this hospital. Inspite of its being a headquarters hospital, it has been neglected. Even though provision is made in the budget for the improvement of other district headquarters hospitals, this hospital has not figured prominently in their view. I hope that in the Second Five-Year Plan out of the amount allotted for hospitals, a major portion of it would be utilized for this hospital. Through private contributions and donations, we have been able to raise about Rs. 8.0 lakhs and with it we have constructed a maternity ward, an operation theatre and one blood bank, all at a cost of Rs. 3.0 lakhs. I request that improvements should be done as early as possible.
Sri K. V. Ramanayya Naidu:—

It is also mentioned that so many irrigation schemes have been taken up. We are glad for it. But the point is, most of us may not survive to see these irrigation schemes. Whatever it is, apart from the irrigation sources, the drainage sources are completely neglected in the Krishna district. There are certain drainage channels which have never been repaired for the last 40 years. If irrigation sources are not improved, what earthly use is it to the ryot. When he is able to take the produce in December or February, if monsoons breakout or there are heavy rains, all his produce is wasted or the land is submerged. Therefore I request the Government to direct the P. W. D. authorities to repair drainage channels also. The P. W. D. subordinates are very callous and the way they carry on the administration is certainly deplorable; they are like archakas not giving the boon even though God gives it. I request the Government to improve the drainage channels also along with new irrigation sources.

All our Ministers, the Chief Minister, the Revenue Minister, the Planning Minister and the Public Work Minister, were all pleased to come and visit the flood affected areas and see what havoc has been wrought in the Krishna District. The loss is estimated to be about Rs. 2.0 crores. I would once again request the Government to take early steps to see that what is given by one hand is not taken away by the other hand on account of intervention nature of the P. W. D. subordinates.

DISCUSSION ON THE GOVERNOR'S ADDRESS

Sri N. Govindarajulu:

The subscriber desires to address the distinguished members of this august assembly. On the 23rd day of the month of May, the Governor's address was delivered in this assembly. The address began with a reference to the year 1856 being a significant year in the history of the state. The Governor stated that the population of the state had increased significantly since then.

The state's infrastructure had also improved, with new roads and bridges being constructed. The Governor highlighted the importance of education and announced that a new university was being established in the state. The Governor also discussed the state's economy, stating that it had grown significantly in recent years.

The Governor concluded his address by expressing his hope that the state would continue to develop and thrive in the future. He thanked the members of the assembly for their support and dedication to the state.
DISCUSSION ON THE GOVERNOR'S ADDRESS

Sri N. Govindarajulu:—

As usual the address by the Governor is excellent. The Governor has stressed the need for
improvement in the working of government departments. The Governor has also
recommended direct recruitment of labour.

Sri E. NAGAYYA:—

In my view, the Governor's views need to be implemented. The Government should
undertake any repairs and improvements. The Government should also provide
employment exchange offices in various areas.

The labour unions need to be strengthened. Contractors should combine and contract
labour union contracts. Labour unions need to be strengthened.

SRI P. BASI REDDI: Mr. Speaker, Sir, the Governor's Address gives quite an imposing list of the achievements of the Government since the formation of this State. They are really substantial achievements of which the Government could well feel proud. I am however concerned for the time being with the achievements of the Government in the backward areas of the State, especially the famine-striken area of Rayalaseema. I express my gratitude on behalf of Rayalaseema for all what the Government has done for the betterment of this area. During the last one hundred years of the British regime, nothing like a developmental work has been done in this unfortunate part of the State. But since the advent of the Congress regime, especially after the formation of Andhra State, we have been seeing all round development in this area. We have now got a university of our own, an Engineering College, a training college and we are likely to get a medical college; we are told we are getting a polytechnique too; and the four districts of Rayalaseema can now boast of an arts college; several high schools have been started in this area after the advent of the Congress regime and a much larger number of elementary schools have also been opened. Of course, there is still great need for more high schools in the area. I understand the Government has only made a provision for 30 schools or so for the entire State during the second Five-Year Plan. I submit that this is quite inadequate and 30 Schools would not be sufficient even for Rayalaseema. I therefore urge that a much larger number of high schools may be provided in the Second Five-Year Plan.
In regard to communications also, appreciable progress has been registered. A number of causeways have been constructed on all the important roads in Rayalaseema area and some bridges also have been constructed, most important of them being the bridge over Pennar near Chennur. It is being constructed at a cost of Rs. 25.0 lakhs and it is gratifying to note that it will be completed are long. By and large the condition of the roads also has been improved appreciably. I understand that the allotments made for the maintenance of roads during the current year is very inadequate and I am afraid, if that is correct, the condition of the roads may suffer serious deterioration. I therefore urge upon the Government to find out ways and means to make increased provision for maintenance of the roads. Of course, the condition of the district board roads is as bad as ever, if not worse. The present hopeless financial position of the district boards cannot make it possible for them to improve the roads. There are still some important roads under the control of the district boards, Of course, the Government are gradually taking over these roads to highways, but I am afraid the pace of this process is rather tardy. I appeal to the Government that these important roads should be taken over by the Highways Department in the quickest possible time. The argument of financial difficulty may be advanced by the Government and that plea has become ubiquitous nowadays. My answer is, the taxes have been multiplied at a very fast rate and they can multiply a little more to meet the needs such as the present.

Then, Sir, what is most gratifying, so far as the Rayalaseema area is concerned, is the execution of irrigation projects in the frequently famine stricken area of Rayalaseema. The most important project, so far as this...
area is concerned is the Tungabhadra High Level Canal. It runs entirely through the worst famine areas of Rayalaseema and it is likely to be taken up on hand very soon. Several medium size projects have also been executed in that area. There is also the widening of the K. C. Canal. And all these projects cover a major portion of the famine area of Rayalaseema and they are likely to irrigate about 5 lakhs of acres and eliminate famine from a considerable area.

The Government have been resorting to increased taxation measures. Of course, nobody can dispute the need for these measures in view of the Five-Year Plan. But the Government should create a proper atmosphere for reception of these taxation measures. They should first try to eliminate the inequalities in the taxation measures. I refer to one glaring inequality, i.e. water tax on lands under river channels and spring channels. I have been referring to this subject as often as I had occasion to speak in this House. But the Government do not seem to have moved in this matter. The one correct step so far they have taken in this direction is the land revenue standardisation proposal that is likely to come before this House very soon. But even under this proposal, water tax on lands under river channels does not seem to have been touched at all. Of course they have made an exemption in favour of lands under river channels so far as the enhanced land revenue is concerned. I submit, Sir, it is not enough. The Government should do away with the tax completely and then place all the lands covered by this tax under the appropriate class of lands for being dealt with under the enhanced land revenue proposal. I thank you, Sir, for having given me this opportunity.

Administrators were tiring of a task. In this context, the Governor addressed the administrators on the need to "reform" the existing system. He pointed out the need for "rationalisation" of the Elementary School grants. The Governor noted that the"new" situation had forced the government to extend the Elementary School grants for another year. The government had decided to extend the grant for two years to the Elementary School grants.

The Governor also discussed the Budget figures of the Elementary School and Secondary School grants. He mentioned that the government had increased the grants for these schools. He further stated that the government had increased the grants for Irrigation. The government had also increased the grants for the Departmental Heads and schools. He mentioned that the government had increased the grants for teachers and people. The Budget figures for these grants were discussed in detail. The Governor concluded by stating that the government was committed to improving the education system.

The fact is that we are already facing 24 hours a day, 7 days a week, and the Government of India must take a more active role in planning. The Planning Commission must work closely with the State Governments to ensure that our efforts are coordinated. The current system of telegrams and telephones is outdated and inefficient. We need to explore new methods of communication.

It is important to consider the long-term effects of our actions. We must avoid the trap of trying to bite too much. The Planning Commission should focus on a few key areas that will have a significant impact. The Commission must work on a 4,800 rupee per month plan to address these issues. We must also consider the role of the Planning Commission in coordination with State Governments. It is crucial that we work together to ensure that our efforts are effective.

The Governor's address presented on 7th August 1956 has been the subject of considerable discussion. The government's administration has been reviewed, and the ways and means position has been examined. The government's position in the open market has been analyzed.

A grant has been made by the Government of India to the tune of Rs. 100,000. Contractors' Bills have been paid, and the government has borrowed Rs. 4,000,000. The government has also paid Rs. 1,000,000 to contractors.

The government has also discussed the ways and means position and the administration. The government has been criticized for its handling of the administration and the ways and means position. The government has been urged to improve its administration and ways and means position.
DISCUSSION ON THE GOVERNOR'S ADDRESS

Dr. B. Gopala Reddi] [11th August 1956

The Governor's Address has discussed the financial position of the State. The financial position as presented in the Address is based on the calculation of revenue and expenditure. The actual position, as reported by the Statistical Department, shows a deficit of Rs. 200 lakhs. The Tobacco Department has proposed an increase of 25% in the Budget speech. However, the Commercial Tax Department has recommended a reduction of 10% in the Budget Memorandum.
DISCUSSION ON THE GOVERNOR'S ADDRESS

11th August 1956

[Dr. B. Gopala Reddi]

The Governor's address brought about a sense of urgency. The financial position is currently in a critical situation. The actual deficit is Rs. 25 crores. The Finance Secretary, Patel, explained the situation and emphasized the need for action.

It was mentioned that cheques are being dishonored, leading to financial embarrassment. The Planning Commission revealed that the financial position remains uncertain. Although 218 funds were outlined, the situation is still precarious. Therefore, the Planning Commission advised caution and warned of potential difficulties.

DISCUSSION ON THE GOVERNOR'S ADDRESS

11th August 1956 [Dr. B. Gopala Reddi]

The Finance Commission is at present engaged in the task of preparing a Report on the financial obligations of the States. The Statutory obligation of the Government of the State is to be determined after the issuance of the Report. The Finance Commission is considering the obligations of the States and has submitted a Draft Report.

The Commission has proposed a new system of financial obligations for the States, which is expected to provide a stable and equitable financial framework. The Draft Report provides a comprehensive framework for the financial obligations of the States, which is expected to improve the financial stability of the State.

The new system of financial obligations is expected to reduce the financial burden on the State, which is currently dependent on central Government subsidies. The Draft Report recommends that the financial obligations of the State should be based on a combination of factors, including the economic performance of the State, the size of the population, and the level of development.

The Commission has also proposed a new system of grants-in-aid to the States, which is expected to provide a stable and predictable source of revenue for the States. The Draft Report recommends that the grants-in-aid should be based on a combination of factors, including the economic performance of the State, the size of the population, and the level of development.

The Commission has also proposed a new system of taxation for the States, which is expected to provide a stable and equitable source of revenue. The Draft Report recommends that the taxation system should be based on a combination of factors, including the economic performance of the State, the size of the population, and the level of development.

The Draft Report provides a comprehensive framework for the financial obligations of the States, which is expected to improve the financial stability of the State. The Commission is expected to finalise the Draft Report in the near future.

Sri PILLALAMARRI VENKATESWARLU:— Nationalize the Madras City Transport Company. How can we do it? Do we have permission from the U. P. Nationalized Transport Minister to do it? Is it possible to nationalize them or not?

The Hon. Dr. GOPALA REDDI:— 1946 or 1947, the D. S. P. or R. T. O. was the Transport Minister, you have to take permission from him. The transport minister gave permission and said we are nationalizing the monopoly of Madras City Transport. The complaint is that the Madras City Transport Company is not extending the services in the City. Madras City is now paying the transport minister to extend the services. Madras City paid the transport minister Rs. 20-30 lakhs. The transport minister was paying the debt of the company. The transport minister charged Rs. 25 maximum. (This is the maximum bus fare they can charge).

DISCUSSION ON THE GOVERNOR'S ADDRESS

11th August 1956  [G. Yellamanda Reddi]

The Hon. Dr. B. GOPALA REDDI:—

The issue of registered estates taken over by the Government was raised in the Governor's Address. The Land Reforms Act, particularly the provisions regarding the acquisition of land by the Government, was discussed. The First Five Year Plan, with its emphasis on industrial development, was also mentioned. The need for a comprehensive study of the agricultural sector was highlighted, with a focus on improving yields and productivity. The importance of rural infrastructure was stressed, with proposals for the construction of roads and bridges. The need for better irrigation facilities was noted, with a call for the expansion of canals and other water management systems. The discussion also touched upon the need for better educational facilities in rural areas, with suggestions for the establishment of more schools and colleges. The issue of land tenure was raised, with a call for the implementation of a just and equitable land distribution system. The need for better health services in rural areas was emphasized, with proposals for the establishment of more hospitals and clinics. The discussion concluded with a call for greater cooperation and coordination between the various levels of government and the private sector, in order to address the challenges facing the rural economy.

death duties on Agricultural Lands is a major concern. Nowadays, we seek to divide agricultural lands among farmers. However, this division of agricultural lands has implications on death duties. It is essential to classify agricultural lands and agricultural goods.

In the context of death duties, we discuss the abolition of Inams. The Hon. Dr. B. Gopal Reddi addresses the issue of full assessments on inams. He announces that the east district will have full assessments starting from 1-4-0.

Dr. Gopal Reddi further emphasizes the importance of death duties. He states that the progressive graded surcharge should be abolished.

The Hon Dr. B. GOPALA REDDI:— Prohibition issue is of great magnitude, but at the same time, it is not clear how it is related to Congress High Command and Working Committee. It is a part of a bigger programme, ceilings on national wealth, total wealth by Planning Commission. It is a part of a bigger programme, ceilings on national wealth, total wealth by Planning Commission.

Total income ceiling specified by Planning Committee is 4000 r. This is a part of a bigger programme, ceilings on national wealth, total wealth by Planning Commission.

Constitution says, "you can't take any property without Compensation." Compensation is based on the market value of the property. Instalments may be tenancy, agricultural labour, consolidation of holdings.
