* 274 (6:4:A) Sri G. Bapanayya [Put by Sri G. Visweswara Rao]: Will the hon. Minister for Education be pleased to state:

Teaching of English From Third Standard

420—

* 456 (210C) Q.— Sarvasri Jinna Mallareddy and S. Vemaiah: Will the hon. Minister for Education be pleased to state:

(a) whether the Government propose to start teaching English from 3rd standard in schools in view of low standard of English;

(b) if so, the action taken in this regard; and

(c) whether the English classes will be started in the current year?

Sri P. V. G. Raju:

(a) Yes, Sir.

(b) Orders have already been issued in G. O. Ms. No. 3140 Education dated 20—10—1962.

(c) Yes, Sir.

The Director has been directed to implement the scheme as far as possible from current academic year (1962-63) only.
Sri P. V. G. Raju: It is a progressive programme. In the first instance we are going to implement it in about 2 thousand schools. Gradually the idea is that in all the schools we shall implement as part of the three-language formula that is there in the country.

Sri P. V. G. Raju: All the three languages will be given equal prominence from a certain standard. The regional language is from the first standard because it is the State language.

Sri P. V. G. Raju: There is no connection between transfers and this policy. Incidentally transfers of primary school teachers are in the hands of the Zilla Parishads and the Education Department does not handle these transfers.

Sri T. Balakrishnayya (Satyavedu): What I would like to know from the Government is about the measures taken to get the teachers trained before introducing English from III Standard.

Sri P. V. Raju: Yes, sir. We are having the teachers trained. The British Council has enunciated a programme and we are keeping in line with that programme. We are developing the teaching programme. Also there is an institute here for development of English Studies. Professor Gokak is the Principal of that Institute. It is an all-India institute. Text books are always there.

Sri P. Anthony Reddy: What special steps have the Government taken for English-teaching teachers in 2000 schools where English is introduced from III Standard?

Sri P. V. G. Raju: The British Council has their technical guidance. The Madras Government implemented earlier a scheme whereby teachers were given a short-term, 3 months or 4 months' course in teaching what they call.
Basic English. The new type of English instruction is not of the old type of instruction. It is being taught as a second language and not as main language. This new type of teaching is different and the British Council has suggested that pattern.

Sri P. V. G. Raju: The text books are always there.

Sir: The text books are always there, but the pattern is different. This is now at elementary level.

Sri P. V. G Raju: The children are taught small words like cat, mat, from the Third standard onwards. Main English will be taught from the 7th or 8th standard at a later stage. This is now at elementary level.

Paper Placed on Table of the House

CO-OPERATION - Co-operative Farming - Policy of State Government - Orders - Passed.

Read:— From the Registrar of Co-operative Societies, 170458/60 R. dt 29—1—69.

O R D E R:

In 1959 the Government of Andhra Pradesh constituted a committee under the Chairmanship of Sri K. Amanta-raman, I. C. S., to suggest suitable ways and means for developing Co-operative farming in Andhra Pradesh and other allied matters. The Government of India also constituted a working Group under the Chairmanship of Sri S. Nijalingappa to help the formulation of a programme for promotion of Co-operative farming in the country. The Government of India took certain policy decisions on the
recommendations of the working Group. The Andhra Pradesh State Co-operative farming Advisory Board considered the above recommendations and made some suggestions. In the light of the above and the remarks of Registrar of Co-operative Societies the Government have examined the whole question and have taken the following decisions.

2. Definition of Co-operative Farming Society:

The Government approve the following definition of a Co-operative farming society as recommended by the Working Group.

"A Co-operative farming society is voluntary association of cultivators for better utilisation of resources including man-power and lands pooled, and in which a overwhelming majority of members participate in farm operations with a view to increasing agricultural production, employment and income".

3. Pattern of Organisation:

The Government approve the view taken by the Working Group the pooling of land and sharing of responsibility and risk of farm operations by members are, the district features of a Co-operative farming society. Co-operative better farming societies and tenant farming societies, which do not fulfil the above tests should not be classified as co-operative farming societies and efforts should be made to convert them into societies which satisfy the above test.

4. Voluntary Character of Membership:

The Government direct that there should be no compulsion in the organisation of co-operative farming societies.

5. Admission of Members

The Government direct that membership on the Co-operative farming societies shall be restricted mainly to those who work in the farm or its ancillary activities with the exception of persons who are prevented from doing farm work, on account of physical disability, Government service, age, sex or owning lands in other village. The absentee land holders taken together as a group should not, however exceed 1/4 of the total membership of the society and the total land contributed by the absentee land holders should also be limited to 10% of the total extent of the lands of the society. The Government also consider that the bulk of the
members in a co-operative farming society should be small cultivators of landless poor or both and their classification shall be on the following basis:

Small cultivators:

A small cultivator is one who does not hold more than five acres of land, wet or dry or both.

Landless person:

A landless person may be defined as one who does not own any land.

6. Minimum membership of a society:

The Government direct that the minimum membership required for a co-operative farming society shall be 12.

7. Size of the farm

The Government approve the recommendation of the State Co-operative Farming Advisory Board that the minimum size of a farm shall be 50 acres of wet or 100 acres of dry lands and where lands is a Co-operative farm comprise both wet and dry lands, one acre of wet land should be reckoned as equivalent to 2 acres of dry land.

8. Withdrawal of membership:

The Government direct that withdrawal of membership from a Co-operative farming society should only be permitted three years after enrolment.

9. Return for the Land:

The Government consider that it would be left to the decision of individual societies regarding the payment of suitable return to its members for the lands pooled by them and also whether such returns should be paid out of net income gross income of the societies. The return paid out of gross income should not, however, exceed the limit of rent fixed under the Tenancy laws of the State.

10. Payment of bonus to members:

The general body of each farming society may frame suitable by-laws for payment of bonus to members out of profits earned by the society.

11. Treatment of cattle, implements etc:

The choice of taking over the cattle, implements etc. belonging to the members and payment of their cost shall be left to the individual farming societies.
12. **Consolidation of holdings:**

   The Government consider that consolidation of holdings need not be a condition precedent but that advantage may be taken to consolidation proceedings to encourage co-operative farming.

13. **Authorisation to mortgage the Land:**

   In order to enable a co-operative farming society to raise the necessary medium and long term finances, members of the farming society should be persuaded to authorise the society to mortgage the lands pooled for raising loans for the common purposes of the society. In case of failure to secure such an authorisation, the society may create a charge on the pooled land after the integrated Co-operative Societies Bill becomes Law, in which there is a provision to create such charge.

14. **Pattern of assistance:**

   The Government of India decided that Cooperative farming societies should be eligible on a priority basis under various schemes which provide assistance to individual cultivators. The State Co-operative Farming Advisory Board endorsed this decision and recommended that Departments of Government Concerned with promotion of agricultural production may issue suitable instructions to extend assistance to Co-operative farming societies on a priority basis. The Government accept this suggestion. The Agriculture, Revenue, planning and Local Administration Department of Secretariat will issue suitable orders separately making provision in the rules governing grant of loans for treating Co-operative farming societies on a priority basis.

15. **Share Capital Contribution:**

   The contribution by Government towards share capital of each farming society shall be Rs. 2,000/- (Rupees two thousand only) and it should be retired in a period of ten years. There will be no nomination of directors by Government on these farming societies.

16. **Short-Term Loans:**

   The Government approve the recommendation of the State Cooperative Farming Advisory Board that Government guarantee should be given to the Co-operative Financing Agencies for the short term loans advanced to the Co-operative Farming Societies.
17. **Medium and Long-Term Loans:**

The Government agree to provide long and medium term loans to Cooperative farming societies on an average of Rs. 4,000/- (Rupees four thousand only) per society.

18. **Godown-Cum-Cattle Shed:**

The Government agree to provide financial assistance not exceeding Rs 5,000/- (Rupees five thousand only) for each farming society for construction of godown-cum-cattle shed. The assistance shall be 25% in the form of subsidy and 75% as loan.

19. **Managerial Assistance:**

The Government agree to grant subsidy not exceeding Rs. 1,200/- (Rupees twelve hundred) per annum to a Co-operative farming Society over a period of 3 to 5 years towards managerial expenses. The Government also accept the suggestion of the State Co-operative Farming Advisory Board that one of the members of the society who has some aptitude and interest for the work may be selected and given training.

20. **Administrative Arrangements:**

The Government of India have decided that District Cooperative Unions should look after Co-operative farming societies along with other types of Co-operative Societies in the districts. The Government consider that Co-operative farming societies which are in the initial stages of development should function under the close supervision of the Cooperative Department and should not be left to be looked after by District Cooperative Unions.

21. **Physical Targets:**

The Government direct that during the Third Five Year Plan period about twenty carefully planned projects at the rate of one project for each district should be organised under varied conditions in selected community development blocks. The programme for 1961-62 envisaged starting of six pilot projects but this was not implemented. For the year 1962-63 the Registrar of Co-operative Societies has proposed the starting of four pilot projects. The Government approve the proposal of the Registrar of Co-operative Societies and direct that during the year 1962-63 a total of ten pilot projects should be started inclusive of the six projects not implemented during the year 1961-62. Under each pilot project, there will be 5 co-operative farming societies.
22. Legislation:

The Government consider that there is no need for separate legislation on the subject at this stage.

23. This order issues with the concurrence of Finance Department – Vide F A. (Agri.) U. O. No 4996 F. A./Agri./62-1 dt. 12-6-1962.

The Government direct that the contribution of share capital of Rs. 2,000/- by the State Government to Co-operative Farming Societies as indicated in para 15 of the G. O. first cited shall be on a matching basis.

(2) In partial modification of the orders issued in para 19 of the G. O. first cited the Government direct that the subsidy of Rs. 1,200/- paid to Co-operative farming societies towards managerial expenses shall be over a period of 3 to 5 years and not at Rs 1,200/- per annum as indicated in para 17 of the G. O. first cited.

re : Relief measures in flood affected areas in Visakhapatnam district.

Due to heavy rains in the month of October and the consequent floods in Sarada and Varaha rivers and other irrigation sources in Visakhapatnam district, extensive damage was done to the crops and irrigation sources, major and minor highways, buildings etc. In all 567 villages in all the taluks of the district except Chintapalli and Paderu were affected and crops to an extent of 52000 acres of wet and 12000 acres of dry were damaged. 2050 minor irrigation sources and 35 sluices have been damaged and an extent of 5215 acres was sandcast. The loss of property estimated is about two crores. The Government have carefully assessed the flood havoc caused in the district and sanctioned as an immediate measure, an additional sum of Rs. 6 lakhs for repairs to the flood damaged minor irrigation works over and above the normal provision under minor irrigation works and a further sum of Rs. 1 lakh for affording relief to the families affected by the floods. Further proposals of the Collector for the grant of remission, suspension and grant of loans etc. have been received through the Board of Revenue and they are under consideration. Pending final orders on the remission proposals, the Collector has been instructed to issue instructions to the local revenue officers for postponing the collections to the extent of the affected areas.

Calling attention to matters of urgent Public Importance

re: Failure of crops in Kolleru area, Eluru Taluk

Sri N. Ramachandra Reddy: On account of rains during September 1962, Kollair lake was in floods. Vast areas of fields with crops in some of the villages adjoining Kollair in Eluru, Bhimavaram and Tadepalligudem were under submersion. River Godavari was also in floods and Polavaram Town and certain villages of Tanuku Taluk were inundated with Godavari waters. Besides Godavari and Kollair floods, there were floods in Yerrakalva, Yenamaduru drain and other drains in West Godavari district causing submersion of large extents of fields with paddy and other crops in Bhimavaram, Eluru, Tadepalligudem and Kovvur taluks. In all, standing crop to an extent of 102086 acres was damaged. The Collector has proposed that a sum of Rs. 1,94,240 was required for granting monetary relief to the persons whose houses have been damaged. There was already a sum of Rs. 70,000 placed at the disposal of the Collector by the Board and the balance of Rs. 1,25,040 was sanctioned by the Government towards the expenditure for granting relief to the flood-affected victims. The actual extent of damage can be ascertained only after intensive ajmoish. 6508 houses have been damaged. The Collector has proposed that a sum of Rs. 1,94,240 was required for granting monetary relief to the persons whose houses have been damaged. There was already a sum of Rs. 70,000 placed at the disposal of the Collector by the Board and the balance of Rs. 1,25,040 was sanctioned by the Government towards the expenditure for granting relief to the flood-affected victims. The actual extent of damage can be ascertained only after intensive ajmoish. Though vast extents were submerged, the period of submersion was short. There may not be extensive damage to the crops. If the damage done to the crops is intensive, and wide-spread, the Collector would come to the Government with grant of remission (B. S. O. 14). If however, the damage is not very extensive and widespread, the Deputy Collectors themselves are competent to grant remissions themselves under seasonal remissions i.e., under B. S. O. 13. As and when any proposals are received for further relief from the Collector with the required particulars in support thereof, they will be considered by the Govern-
ment expeditiously. As regards early grant of loans to Kollair lake bed lands, it is submitted that in G. O. 947 (Rev) dated 9-6-1962 the powers in respect of leasing out of lands were delegated to the Revenue Divisional Officers who may grant up to 20 acres, Collector up to 100 acres and over and above 100 acres by the Board of Revenue. In respect of Co-operative Societies, the Collector may grant leases up to 150 acres and the Board of Revenue to any extent. Some representations about damage caused to the crops by submersion under Kollair lake were received. It is not known whether the crops damage were in the lake bed or in other lands. Reportes have been called for from the Collector of West Godavari. His report is awaited. Kollair lake bed lands which are situated in Krishna and West Godavari district are being leased out to individuals as well as to the Societies twice in a year for first and second crops cultivation under certain conditions. According to condition 8 of the rules the grantee shall not be entitled for the grant of remission, of water-cess for failure of crops due to excess or deficiency of water, that in case canal water is utilised for cultivation of land, the grantee shall pay the appropriate water cess according to the rules. The reason for the above rule appears to be that these Kollair lake bed lands are fertile lands that there will be adequate supply of water in the lake and that there is no question of failure of crops in the Kollair lake bed, for want of water in the Kollair lake bed. If crops fail due to submersion, the cultivators themselves are to blame, for they could harvest the crops sufficiently in advance on the offset of the monsoon. Moreover, the conditions governing the lease are different from those governing patta lands. It is for the above reasons that provision of remission is not provided for in the rules and the rules have been existing since a long time.

re: Postponement of repairs to Chinnatumblam tank

Mr. Speaker : The next matter also is under rule 74.

Sri P.O. Satyanarayana Raju : I submit that Chinnatumblam tank in Adoni taluk is a major irrigation source under the control of the P.W.D. authorities. The ryotes viz. in Sankesari Malapalli, Chavatapalli, Nagalapalli and Ohma
Tumbalam villages in my constituency have been raising both Mungari and Bangari crops under this tank ever since the supply of water to the tank under the Tungabhadra low level channel. Now the PWD authorities propose to undertake repairs to its sluice depriving the ryots from raising a second crop. This is hardly the time for repairs, because there is no leakage in the sluice. Being an area with crops over an area of 200 acres, there is pressing need for letting out tank full water. It is therefore urged that the hon. Minister for Irrigation & Power may direct the Executive Engineer P. W. D. Adoni to postpone the repairs till the National emergency ceases and attend to repairs if there is still need only after the second crop.

The Minister for Irrigation and Power (Sri A.C. Subba Reddy): Chinnatumbalam tank in Adoni taluk stores more than 20 feet of water. Both the sluices require repairs which are not attended to since a very long time. The tank has to be emptied to attend to the repairs. There is also no possibility of arranging direct supplies from Tungabhadra low level channel for the ayacut under the tank. The total ayacut under the tank is 1500 acres in the first crop season. The Chief Engineer (General and Irrigation) reported that sufficient notice was given through the Gazette after discussing the matter with the ryots of the village as well as with the Collector. On the representation made through Sri Satyanarayana Raju and in view of the emergency, second crop is allowed to be raised under this tank.

A detailed report on the construction of national highways shows that the total expenditure on the project is expected to be Rs. 62-63 crores. The project includes the construction of 20 national highways at an estimated cost of Rs. 6 crores. The roads will be remodelled with modern techniques to improve safety and efficiency. The project aims to provide a safe and efficient mode of transportation for the people of the region.

Highways works have been ongoing for the past six years. The government has invested heavily in the project, with a total expenditure of Rs. 100 crores. The project has been completed ahead of schedule, and the roads are now open for public use. The government is pleased with the progress made and looks forward to continuing the project in the future.

In conclusion, the demands for grants for further expenditure on national highways are justified as the project is expected to have a significant impact on the economy of the region. The government is committed to completing the project in the shortest possible time and ensuring that it is of the highest quality.

On the other hand, the existing financial arrangements do not permit the Government to
meet the deficiencies in its programme in full. The Government is therefore required
to seek the support of the Legislative Assembly to meet the additional expenditure
incurred in 1962–63. This expenditure is estimated to be Rs. 38 lakhs, which is
considerably higher than the amount estimated in the Budget for 1962–63.

The Government has taken over a number of estates and has assumed responsibility
for their management. These estates are situated in various parts of the State and
include large areas of land. The transfer of management to the Government has been
accompanied by the assumption of various responsibilities. These responsibilities
are of a technical nature and include the supervision of the estates, the
presentation of annual reports, and the preparation of detailed plans for the
development of the estates. The Government has taken over estates in the

The Government is committed to the development of these estates and has
allocated a substantial amount of funds for this purpose. The development work is
progressing well and the estates are expected to become self-sufficient in the near
future.

In conclusion, the Government is seeking the support of the Legislative Assembly
to meet the additional expenditure of Rs. 38 lakhs in 1962–63. The assumption of
responsibility for the management of estates has been accompanied by the
acceptance of various responsibilities, which are being diligently fulfilled.

So long as there is no sufficient water for irrigation, for the thirsty and famine area. It is not morally justified to make the position worse by diverting the wather into the sea. "Sch. mes Which contemplate diversion of Krishna Basin water for purposes of power generation into the Arabian Sea also have to be dropped so long as there is no sufficient water for irrigation, for the thirsty and famine areas...
