THIRD SUPPLEMENTARY REPORT OF A. P. REGIONAL COMMITTEE ON WHITE PAPER

1018—

* 689 (1797) Q.—Sri Bh. Nagabhushana Rao. [put by Sri J. Mallareddy (Sultanabad)] :—Will hon. the Chief Minister be pleased to refer to the answer to Question No. 457 answered on 18-6-1962 and to state:

(a) What are the steps taken by the Government to remedy the various injustices done to Telengana employees violating the instructions of the Government of India and the safeguards provided under S. R. Act as pointed out in the Third Supplementary Report of the Sub-Committee of the Andhra Pradesh Regional Committee on white paper on Telangana services;
(b) whether the Government intend to set up a High Power Body to probe into the matter and examine the cases of injustices pointed out in the said Report; and

(c) If not, why not?

_The Chief Minister (Sri K. Brahmananda Reddy):—_

(a) Matters relating to 'Services' are outside the purview of the Andhra Pradesh Regional Committee, not being scheduled matters referred to in clause 2(f) and the First Schedule of the Andhra Pradesh Regional Committee Order, 1958. Nevertheless, the Government propose to examine the several matters referred to in its reports on 'services' and take suitable decisions on the merits of each recommendation of the Regional Committee. As regards safeguards all representations are carefully considered by the Government, and the advice of the Government of India has always been sought on doubtful matters. On all injustices or grievances relating either to seniority or integration of services, the aggrieved Government servant has a Statutory right of representation to the Government of India, who have appointed two Statutory Committees under Section 115 (5) of the S. R. Act to advise them on these matters. The decision of the Government of India on such representations is final and binding on the State Government.

(b) The Constitution of a High Power Body is one of the recommendations made by the Sub Committee of the Andhra Pradesh Regional Committee in their third report, which is separately under examination.

(c) Does not arise.
ADMISSIONS TO THE PROFESSIONAL COLLEGES

1019—

*124 (2216) Q.—Sri K. V. Narayana Reddy [Put by Sri P. Rajagopala Naidu (Tavanampalle)]: Will the hon. Minister for Education be pleased to state.

(a) whether the State Government are aware of the inordinate time taken by the University Colleges and other Institutions of Higher learning especially the technical Colleges in finalising the lists of admission to various courses of study offered by them that has occasioned widespread anxiety and concern to the parents of candidates seeking admission to these courses; and

(b) if so, the specific steps taken or proposed to be taken by the Government to put an end to this intolerable situation?

[The Minister for Excise and Prohibition deputises the Minister for Education and answered the questions]

The Minister for Excise and Prohibition (Sri M. R Apparao):

a. It is reported that there has been no delay except in the case of professional college at Anantapur.

b. To avoid delay it is proposed to have a common set of rules for admissions to all the Engineering Colleges and the matter is under consideration.

Sri M. R. Apparao: Sir I will give the reasons for the delay: (i) late announcement of P. U. C. result which necessitated the extension of the last date fo
admission; (ii) discontinuance of some of the candidates admitted which necessitated admission of candidates from the waiting list; (iii) non-utilization of some of the seats reserved for other States which necessitated the seats being transferred to the central pool and admissions made from the waiting list. There are some of the reasons Sir; but instructions have been issued and all the universities are trying their best to adhere to 31st July as the last date.

Sri R. Apparao: This is a general question, Sir. This year admission was delayed by one month. Generally it is done in time.
Sri M. R. Apparao: Sir, B. Sc. students apply to two or three professional colleges. They apply to the Medical college, they apply to the agricultural college, they apply to the veterinary college. They wait until all the seats are finalised and then if they get no seat, then finally they go to the B. Ed. So, that is the reason for the delay, Sir.

The Registrar, Sri Venkateswara University has stated that there has not been any inordinate delay in the admissions made by the University colleges including the University college of Engineering, Tirupati. The Registrar said Sri Venkateswara University seems to have circulated certain instructions minimising the delay in admission in consultation with them for adhering to 31st July.
The Registrar, Osmania University has stated that Osmania University is very anxious and it has been trying various methods to finalise admissions as early as possible. The recommendations of the Andhra Pradesh Regional Committee which the University has to follow, are not received well in time. Since these rules are to be given effect to, it was not possible to finalise the admissions early.

The memoranda of marks not made available to the students immediately after the declaration of H. S. C. and Multipurpose results: So long as these are not available applications cannot be arranged in order of marks. It may be mentioned here, that for P. U. C. the university receives about 3000 applications which are to be sorted out according to different categories and reservations and also arranged in the order of marks. This work cannot be commenced so long as the marks are not available.

Admission to the B. Sc. cannot be finalised unless the admissions to medical colleges are finalised. It has been the experience of the university that when the last date of admission to B. Sc. was published, hardly 10% paid the fees. This is because most of the candidates wait for the publication of medical list and that list is not announced early. After the medical list is published those not getting admissions try their chance in B. Sc. Agriculture or B. V. Sc. or B. Sc. and thus our admissions are prolonged. Steps are being finalised for admissions within one month from the date of submission of applications for admission to various courses.

The Registrar, Andhra University has stated that there was no inordinate time taken in finalising the list except in the case of admissions to Agricultural College, Bapatla, where admissions are prolonged up to September, 1962 as the rules for admissions were received late. During the current year 95% of the seats in Engineering Colleges were filled before the date stipulated by the Universities. Concurrence of the Universities for making
late admissions beyond 31-7-63 in respect of Engineering Colleges has not been obtained.

The following are the reasons for making late admissions beyond the stipulated time:

(i) discontinuance of some of the candidates which necessitated for filling up of vacancies ...

Mr. Speaker: This is no good, Mr. Apparao. You are expected only to answer the questions that are put to you but not go on reading all the information. That might cover full information, but all the same you are expected to provide information only to the question put by the hon. Members. Otherwise it will take a lot of time.

95% of the seats are admitted, Sir. Only a few seats are delayed because some of the candidates do not come, some of them do not pay fees and for some of the reserved seats for outside States, the students sometimes do not come and then we have to admit our students.
Mr. Speaker: I think that was the main reason. In fact writs were not disposed of till about the end of September or so, if I remember correct. With regard to the allocation of seats whether it was proper or not to allot seats on communal basis and some thing like that.

Mr. Minister for Public Health: It is true Sir, not only that. High Court gave the High Court list. But list was delayed, so that high court instructions were followed. That is my complaint. I agree with what the Hon. Minister for Public Health has said. The list was there. The High Court has given a ruling and accordingly they have resettled everything. The Government have instructed that this is not the final list, you may try to do like this, and it was so much delayed. After second selection, why it has happened?

(No Answer)

Sri Vavilala Gopalakrishnayya: The hon. Health Minister was kind enough to intervene. That is why we are asking.

Sri S. Narasimha(Kanpur): Technical college seats reserve B. Sc. seats. For the technical college selections are held. The number of seats reserved is 100. The seats are applied seat reserve. So Seats reserve

the prescribed form. Hence all of them—this is regarding Engineering College, Kakinada, Sir—were classified as others that means they are not given any special concession.

The main buildings of the Government Engineering College at Kakinada were constructed on the private lands which were requisitioned by the Government under the Land Acquisition Act and proper compensation paid to the citizens.

COMPENSATION FOR THE LAND OF GOVT. ENGINEERING COLLEGE BUILDING AT KAKINADA

1024—

* 2154 Q.—Sri M. Veera Raghava Rao (Put by Sri T. K. R. Sarma): Will the hon. Minister for Education be pleased to state:

(a) whether the present Main buildings of the Government Engineering College at Kakinada are constructed on Government property or private property of citizens; and

(b) if it is not Government property, has the Government acquired the property under the Land Acquisition Act and proper compensation paid to the citizens?

Sri M. R. Appa Rao:

(a) The main buildings of the Government Engineering College at Kakinada were constructed on the private lands which were requisitioned by the
Government of India, Ministry of Defence during the II World War, out of which a part was already derequisitioned by the Government of India and acquired by the State Government and action is being taken to obtain the orders of Government of India for derequisitioning the rest of the land and to acquire the same.

(b) No Sir. Unless the lands are derequisitioned by the Government of India the State Government cannot acquire the property under Land Acquisition Act and pay proper compensation to the parties. Government are taking necessary action for acquisition of 9-30 acres of private land in S. Nos. 137/2, 137/3, 1/3 and 1/4 which was derequisitioned by the Government of India.

In the meantime, Government is taking all necessary action for derequisitioning the land in order to carry out the works under power project in the area in pursuance of the orders of the Government of India.

purposes of lighting and other Industrial base create a superior preference. Generation of electricity to meet the demand "generate" at the rate of 66,000 kw. In this year the demand has increased gradually to 80,000 kw. To this end we have increased the number of generating sets. The demand has increased by 15,000 kw. We have increased the output of generating sets to meet the increased demand. The increased demand for irrigation has been met by the increase in generating capacity. It is gratifying to note that the increased demand for generation has been met by increasing the output of generating sets. We are confident that the increased demand for generation will be met by increasing the output of generating sets.

Irrigation potential creation

The potential creation of irrigation facilities requires adequate funds. The potential creation of irrigation facilities is crucial for the development of agriculture in the region. The funds required for this purpose are substantial and need to be allocated properly.

The irrigation potential is expected to increase significantly with the allocation of adequate funds. The existing irrigation facilities will be further enhanced to cater to the growing needs of the farmers. The objective is to ensure a sustainable and equitable distribution of water resources.

The potential creation of irrigation facilities is essential for the improvement of crop yields and the overall economic development of the region. The funds will be allocated in a way that maximizes the benefits to the farming community.

In conclusion, the potential creation of irrigation facilities is a priority area for the government. The allocation of adequate funds is crucial for achieving the desired outcomes. The farming community will benefit greatly from this investment, leading to improved crop yields and enhanced livelihoods.

Amounts required for technical clearance

The amounts required for technical clearance are substantial and need to be allocated properly. The funds will be used to ensure that the irrigation potential is developed as per the technical requirements. The farming community will benefit greatly from this investment, leading to improved crop yields and enhanced livelihoods.
