Export Potential Survey

To: QM/SNOS

Department of state.

The export potential survey report is submitted herewith for your consideration.

Trade Agent:

Recommendations:

1. Export promotion measures in state B.

2. Trade Agent's duties and responsibilities.

3. Benefits to Trade Agents.

4. Duplication of trade representatives.

5. Government of India.

Tobacco exports:

Surpluses are exported through a special agency.

Special measures:
Sri K. V. Narayana Reddy: (a) & (b): The State Government have proposed to send two Sales Teams to South East and Middle East Asian Countries to explore markets for exportable commodities and to finalise business. The Government of India are not inclined to accept the proposal of sponsoring such teams on State-wise basis as they would form a precedent for other States. Since the exportable commodities are produced in many States in India, it has been the normal practice for the Export Promotion Councils to send such delegations on Commodity wise basis and not on regional basis. It has been suggested that the members of the proposed teams might visit foreign countries for business purpose on individual basis. It is also proposed to depute Ministers for Labour and Industries each accompanied by an official of State Government to undertake study tours. Further details will be worked out on receipt of Government of India's concurrence which is awaited.

Sri G. Sivaiah - Are there any rules that prevent us to send teams? Why should we wait for the Central Government's permission?

Sri K. V. Narayana Reddy: There are no such hard and fast rules. There are such precedents and conventions. The Government of India has been sending delegations on commodity basis. They have not so far given permission to any State delegations.

(b) whether it is a fact that a bridge was constructed over the Pamulakalva (a distance of one furlong from that bridge on the northern side) in olden days and during rainy season the water is overflowing near this bridge resulting in heavy loss to the neighbouring fifty villages; and
(c) whether the Government will take steps to widen the said bridge to protect the villages from the pressure of the water?
Sri J.V. Narasimha Rao—(a) No Sir. It is not correct to say that the new bridge under construction at M. 47/7 (and not at 48th mile) is not useful to the public.

(b) Yes, Sir. But the overflowing of water does not occur at the old bridge at M. 18/2 but at the Dip in M. 47/7 where the new bridge construction was taken up to prevent the overflow and interruptions to traffic. There is however no report that the overflowing water results in heavy loss to neighbouring villages.

(c) No Sir, as the construction of new bridge at M. 47/7, already taken up will serve the purpose.

(c) Information is not, at present, available, however, it will be collected as soon as possible.

Sri G. Sivaiah:—Sir, I request you to allow me to put a supplementary on Question No. 507, Sir.
BUSINESS OF THE HOUSE

Mr. Speaker:—His short notice question is posted to 18th March. It will be taken up on 18th.

Mr. Speaker: They have not yet put up. As soon as they put up the papers to me, I will give my ruling:

Mr. Speaker:—I will see that the information is given.

Mr. Speaker:—When copies of the Report are being circulated to the Members, they are circulated for the information of the Members. Second thing is that there is no point in simply circulating such a valuable report to the Members without allowing a discussion on that. So, I will consult the Members of the Business Advisory Committee and I will act as per their decision.

Mr. Speaker:—That I do not know.

Mr. Speaker:—When a matter under Rule 95 was under discussion, I specifically asked the Chief Minister whether the Government intend to move a motion, he said that 'they cannot say at present. That is what he said.
24 14th March, 1969. Calling attention to a matter of urgent public importance:
re: Maintenance of Buckingham canal from mileape 36 to 175.

Mr. Speaker:—It will come day after tomorrow.

Mr. Speaker:—Regarding that please give me notice.

Mr. Speaker:—So, you say that I made distinction between Andhra and Telangana Members.

( Laughter )

Sri C. V. K. Rao:—Distinction between lady and male Members, Sir.

Mr. Speaker:—That is alright. Now, I will take up the Call Attention Motions.

CALLING ATTENTION TO MATTERS OF URGENT PUBLIC IMPORTANCE
re: MAINTENANCE OF BUCKINGHAM CANAL FROM MILEAGE 36 TO 175.

...
Calling attention to matters of urgent public importance:

Release of water for Dalva crop in Krishna water delta.

Sri J. V. Narasing Rao—The Buckingham canal is a tidal one and mostly running through back waters, depressions, low-lying lands and estuaries of all rivers in its length. The Buckingham canal may be divided into two reaches, viz. North canal which extends to 106 miles north of Madras and south canal which extends to about 62 miles south of Madras. The length of the canal in the Andhra Pradesh is about 110 miles i.e., from M. 35/6 plus 270 to 1152 plus 380 i.e. upto Pedaganjam lock.

The latest navigability reports to the end of January 1969 received from local officers show that the navigation in the reaches from M. 35 to M. 175/0 was average and hence it is considered that the navigation is nearly normal. Whenever any difficulties are brought to the notice of the local officers, action is being taken to remove the silt from the difficult reaches promptly. Siltation in the canal is quite a usual feature and it is not possible to tackle the entire length of the canal under the present difficult financial conditions.

In 1968-69 about Rs. 8.20 lakhs only could be spent on work of silt clearing nature in view of meagre allotment. For 1969-70, a sum of Rs. 7,00,000 has been proposed and Rs. 5,83,000 is allotted in the budget. The present position is that during high tide there is no difficulty for navigation. But during low tide there is some difficulty at certain places, which could not be helped. All efforts are being made to see that the navigation is made as easy as possible. If any difficulty in any particular reach is reported, prompt action will be taken. In the circumstances, it is not correct to say that maintenance is grossly neglected in the Buckingham canal.

It can also be mentioned that there is a proposal for the integrated development of Buckingham canal in Andhra Pradesh limits at an estimated cost of Rs. 200 lakhs. Out of this, an amount of Rs. 60 lakhs is proposed in IV Plan tentatively. The Government is anxious to improve the Buckingham canal as early as possible and further action is being pursued with Government of India and the Inland Water Transport Committee.

Re: Release of water for Dalva crop in Krishna Water Delta.
Sr. S. Sidda Reddy:—Sir, in December 1968, the Government issued orders to supply water to the entire area of Nagarjunasagar project under second crop including 1.1 lakh acres wet under the left canal up to 15-4-1969. It was further ordered that supplies may be given to the second crop about 5 lakhs acres or less in Krishna Delta depending on the availability of water after meeting the requirements under Nagarjunasagar canals. During the second crop conference held at Vizanawada on 19-12-1968 it was decided to give supplies for about 55 lakhs acres of second crop in Krishna Delta provided the ryots grow early maturing crops. It was also made clear that there would be no direct supplies from Nagarjunasagar reservoir for Krishna Delta during 1-4-1969 to 15-4-1969 in order to maintain the obligatory level of 5.5 on 15-4-1969 in Nagarjunasagar Reservoir to command N. S. canal ayacut. It is expected that the ryots might raise early maturing crops which may not require any water after 1-4 1969. If any area requires water during 1-4-1969 to 15-4-1969 the return flows from N. S. Canals and also from storage of Krishna Barrage would be available for utilisation under Krishna Delta. If these flows also are found insufficient, some slight adjustments could be made by releasing available water from N. S. Project for Krishna delta to tide over the situation.

A transfer of departmental residential college has been requested and sanctioned. The Higher Secondary School and residential college are to be transferred to the Education Department.

Mr. Mandal raised a point regarding the accounts and budgets. He mentioned the paucity of funds. He suggested that the Central Government should be approached to provide additional funds. He also mentioned the need for better infrastructure and facilities. He suggested a conference to discuss these issues further. He also mentioned the need for a more efficient use of funds to improve the quality of education. He called for better communication between the local administration and the education department.

Drought affected areas are in need of immediate assistance. The Central Government has already sanctioned Rs. 100 million to various drought-affected states.

General discussion

The Minister for Agriculture, Dr. D. Ramana, informed the House that the drought situation in the country was serious. The rainfall in the past few months had been below average, leading to a decrease in the availability of water resources in many states. The Central Government had already released Rs. 100 million to states affected by drought. However, the situation was still critical, and more assistance was needed.

The Minister assured the House that the government would continue to monitor the situation closely and provide whatever assistance was required. The government had also initiated steps to improve water management and conservation practices.

The opposition Members, however, expressed concern over the government's response to the drought crisis. They pointed out that despite the government's efforts, the situation remained critical, and more immediate action was required.

The Minister assured the opposition Members that the government was aware of the situation and was taking all necessary steps to address it. He added that the government was working closely with the states to identify the areas most affected by the drought and provide the necessary assistance.

The House adjourned for the day.

Sri S. Jaipai Reddy (Kalvakuntla): Mr. Speaker: Sir,

I rise to speak for the first time on the floor of this House. I therefore make my obeisance to this House and seek the blessings of the House and the Hon'ble Speaker. We have been debating on Telangana problem for the last one week. This has been also intruded into the Budget debate for some of two weeks as I see it. There is not much to debate on the budget because of paucity of funds; another is we are all assembled under a shadow of Telangana movement. I have been listening to various speakers who have been referring to the agitation. I believe they have been talking in the air because they were referring to supranational causes. They were saying that this agitation was brought about because there were serious lapses in implementation of safeguards during the last 15 years. It is true that there were serious lapses but I for one cannot say that this agitation was brought about simply because there were lapses. Some people went to the extent of oversimplifying the issue. In fact the Leader of the Opposition, Mr. L. Raizada said it is an extremely shallow and short sighted understanding of the situation. I think there are two deeper causes or maladies underlying the situation. One is in our country we are finding the ascendency of disruptive and centrifugal forces; another is that this agitation is only a manifestation of the great frustration that is now prevailing in the youth of this country and the world today. We all know that we have to visualise the dialectical progress of the world in terms of conflict between the centrifugal and centripetal forces. This conflict exists in all parts of the world. We know there is a movement in Europe the European Economic Community through which they are trying to unite Europe not only on a footing of economic co-operation but also as a stepping stone to a political union of Europe. A similar process is going on in Africa with the result there is an organisation called the Organisation of African Unity. The same thing is going on in Latin America with the result there is a similar organisation there also. In our own country, centrifugal forces have gained ascendency. You know there was an opinion poll in Goa. People of Goa were electing the Vimochana Samithi into power but when it came to poll they defied the opinion of the party and voted for separation. When the elections took place soon after the poll, they voted the same party into power. Whenever the question of separation is posed to the people in this country they are likely to yield readily to disruptive movements. I therefore appeal to the members to take this problem as a challenge of divisive forces which you must meet on a footing of challenge itself. As you all know, today the youth of the world is in turmoil. If the youth in France, England and America are in turmoil the causes are not economic in nature because their turmoil is in the midst of affluence, but in India this turmoil, apart from being spiritual in its characteristics is also material because...
the youth is growing in this country in the midst of dirt, squalour and poverty. Therefore the problem of this country is essentially economical. The students to-day are very frustrated. As a student leader, I have been going about the colleges and persuading the boys to go to colleges. I was telling that they should not lose an year but they are unmindful of it and say 'What do we lose if we lose an year because we are not going to get jobs anyway?'. The separatists have been painting a very rosy picture of separate Telangana. They have been saying that E.L. DOR would be brought down to earth if they have separate Telangana. I would like to tell those friends that separate Telangana is a solution to the problems of Telangana. In 1952 also there was a sudden agitation against non-mulkies. Separate Telangana will not in any way prevent the infiltration or domination of outsiders in this part of the State. The only guarantee against the domination of any other sector of the State is the development of Telangana itself. Therefore I would like to appeal to all the students of Telangana to mind this basic fact that what Telangana requires is not a separation but developmental effort. I therefore appeal to the Government to take all steps that are necessary to develop Telangana.

Yesterday, Mr. Kumar Lalit presented his own account of Telangana surpluses. I believe because all members of Telangana, most members I mean, were a party to the agreement of January the award that has been given by Mr. Kumar Lalit must be taken as final and irrevocable. I am not an expert in accounts, but I believe that his word is morally inviolable and unquestionable. I therefore appeal to all members here and the people outside not to question the validity or veracity of his award. But I would appeal to the Government not only to try to spend this surplus in Telangana but to spend more because the Government of India and the Planning Commission is also committed to the principle of balanced development of the country itself. Balanced development would involve the principle of preferential treatment to backward regions and areas. Therefore, the Government of Andhra Pradesh must not only spend on Telangana what is owned by Telangana but spend more to see that the disparity between the two regions is reduced in a progressive measure.

Without taking much time, I would once again appeal to the student not to get guided by vested interests and disgruntled elements. Economic dissatisfaction, I know is quite dangerous but in my view political dissatisfaction is disastrous. I have been finding no separatists among the Telangana legislators but I have found quite a few apologists of separation. They say that they were told that safeguards were precedent to the formation of Andhra Pradesh and when they were not implemented what was wrong about separate Telangana? "When you ask for separate Telangana perhaps you might get the proper implementation of safeguards." I would not approve of this approach because the slogan perhaps is more dangerous than separation itself. This is just like a husband going to the lawyer and serve a divorce notice to his wife with a view to teach a lesson to his wife and a divorce notice causes more damage to the relation between husband and wife than divorce itself. Therefore, the slogan is more dangerous. Therefore, I say the apologists of
separation, though less ferocious are more dangerous. I believe these apologists are going to do more damage to Telangana than the slogan-mongers of separation. I therefore appeal to all members here to champion the cause of unity because safeguards or proper implementation of safeguards is not going to satisfy the students who have been obsessed with the ghost of separation who are being swayed by separatist, disruptive, divisive and centrifugal tendencies. I would therefore appeal to the people of Telangana to rise above the separatist tendencies and integrate well with Andhra Pradesh and catch up with the rest of the State speedily. Thank you, Sir.

General discussion.

Of the principal causes of opposition to Visala Andhra also seems to be the apprehension felt by the educationally backward people of Telangana that they may be swamped and exploited by more advanced people of coastal areas. The result is a lower qualification than in Andhra is accepted in public services. Telangana, it has further been urged, got a settled and viable unit considered by itself. The revenue receipts of this area on current account have been estimated at about Rs. 17.0 crores.

Chemical fertilizers are deficient in propaganda. As a result, chemical fertilizers are inefficient and results are poor. The saddest part is that the government aid is insufficient. The supply is inadequate. The immediate action of the government is needed to sell chemical fertilizers.

Irrigation & canal side need improvement. The river banks are eroding day by day. The enquiry has revealed that the canal banks need immediate work. The R&B roads are in bad condition. The canal side needs immediate action.

Special intelligence cell has been formed to ensure sufficient justice. T.A. restrictions are imposed. The expenditure limit is just 250 rupees per month. Apart from that, the necessary amenities are provided. The officers are provided unlimited petrol consumption. The raid is conducted at the request of the government.
Sri S. Jayopal Reddi: Sir, I would like to bring one in tune to the notice of the House, that occurred in the university campus just now. Some students who are for the unity of the State went to the campus to propagate their cause. The police was not there and it is learnt that the police has not been there in the campus throughout the agitation. The students who went there were assaulted by some hooligans in the campus and the people that have come from outside have been described as hooligans and goondas. They are bona fide students, student leaders and office bearers and when the police have arrived, these students have been described as goondas. The police has been almost invisible in the campus. I would like to know whether the autonomous university has been raised to the pedestal a sovereign body. I may tell the Government that the police in Delhi entered the embassy areas in maintaining law and order, not rendering the sanctity of the area. I would like to know whether the police of our State cannot enter the campus to protect those who would like to propagate the cause of unity and those who would like to go to the classes. A majority of the boys, I reliably learn, are extremely keen on attending the classes, and the Government is not able to provide protection to those students. I would appeal to the Government to give protection to the students.

Mr. Deputy Speaker: I have anything to say. It seems the police is not there. The hon. Member wants police protection to be given to the students. Has the Government any information?

Sri V. B. Riju: No information, Sir.

Mr. Deputy Speaker: You get information and see what best can be done.

Sri V. B. Riju: Yes.

General Discussion.

Prohibition to scrap was one of the main items discussed. Prohibitions and restrictions on certain goods and services were hotly debated. It was argued that these measures would lead to inflation and ultimately benefit only a few at the cost of the majority. The motion to scrap these prohibitions was passed with a majority vote.

Another point of discussion was the prohibition on the use of certain raw materials. It was suggested that these prohibitions were necessary to ensure a steady supply of these materials to the industries. However, it was also pointed out that these prohibitions were often bypassed and did not serve their intended purpose.

In conclusion, it was agreed that further discussion on these issues was necessary to arrive at a consensus.

S. N. Reddy (Vice Chairman): I second the motion. It is imperative that we take strong measures to control the inflationary trends. The prohibitions we have discussed today are a step in the right direction. It is important that we continue to monitor these measures and make necessary adjustments as required.

A. R. Rao (Finance Minister): I would like to reiterate the necessity of these prohibitions. They are a tool to ensure the stability of the economy. However, we must ensure that these measures do not have a negative impact on the industries and the people.
