 Strikes by the workers of APSRTC from 9-2-1982

The above situation has raised several important points. The workers have been on strike for several days, demanding better working conditions and higher salaries. The management has been negotiating with the workers to reach a compromise.

The workers have been protesting against the management's decision to cut down the number of staff. They claim that this will affect the quality of service provided by the APSRTC. The management, on the other hand, argues that the company is facing financial difficulties and needs to cut costs.

The strike has caused several problems, including delays in transportation and complaints from the public. The government has asked both parties to come to the negotiating table and seek a resolution to the conflict.

The workers have been demanding a salary increase of 30% and the management has offered a 15% increase. Both sides have been trying to reach a compromise.

The situation is complex and requires careful negotiation. The government is urging both parties to work towards a solution that will benefit the workers and the company.

In conclusion, the strike by the workers of APSRTC is a serious issue that requires urgent attention. The government is committed to finding a solution that will resolve the conflict and ensure the smooth operation of the company.

Re: Strike by the workers of APSRTC from 9-2-1982

11th February, 1982

The matter under Rule 329 relates to a strike by the workers of APSRTC. The strike started on 9-2-1982. The reasons behind the strike are due to certain grievances and demands which have not been addressed by the management. The workers have been demanding various concessions and improvements in their working conditions.

The management has been trying to engage in negotiations with the workers to resolve the issues. However, despite several meetings, no agreement has been reached. The strike continues, and the workers are determined to continue their protest until their demands are met.

In this situation, it is imperative for both parties to find a common ground and work towards a resolution. The authorities are advised to take prompt action to address the workers' concerns and prevent further escalation of the situation.

It seems there is a need to address some important matters. Since this is a service-oriented institution, I believe it is essential to discuss the following issues.

Firstly, regarding the infrastructure development, we need to ensure that the facilities are up-to-date and meet the needs of the current and future students. Secondly, regarding the academic curriculum, we should consider introducing new subjects that are relevant to the current job market.

Lastly, regarding the faculty members' satisfaction, we need to ensure that they are provided with adequate resources and support. In conclusion, I believe that these issues are crucial for the long-term success of our institution.
Mr. Deputy Speaker:— I don't want the Member to allege personally over the other Member.
