a) Whether it is fact that in the months of August and September, 1981 about 700 Tonnes of cement was black-marketed by the Contractors in the Rajahmundry Municipality with the connivance of the Municipal Authorities; and

b) If so, the action taken therefore.

MINISTER FOR MUNICIPAL ADMINISTRATION
(Smt. SAROJINI PULLA REDDY)

(a) & (b): The Rajahmundry Municipality obtained a quantity of 1850 Tonnes of cement during the year 1981. Out of this, a quantity of 1550 Tonnes was issued to the Contractors entrusted with the works of the Municipality and these issues have also been utilised and properly accounted for the balance of 300 Tonnes was issued to 14 Contractors even before the Contractors grounded the works entrusted to them by the Municipality. Out of this quantity of 300 Tonnes, 265 Tonnes were subsequently utilised by the Contractors for the Municipal works and the Municipality has been instructed to ensure that the balance of 35 Tonnes is also utilised for the on-going works.
The question was about the black-marketing of cement. The Rajahmundry Municipality obtained a quantity of 1850 tonnes of cement during 1981.

It was known that out of this 1850 tonnes, a quantity of 1550 tonnes was issued to the Contractors entrusted with the works of the Municipality. The balance of 300 tonnes was issued to 14 contractors even before the contractors grounded the works. That is what I have informed, sir.

It means, they have evidently black-marketed the cement. The Contractors have evidently black-marketed the cement. There is no doubt.

(End of Question)
I have asked the Department to immediately hand over the case to the Police.

Definitely, 300 tonnes evidently have been black-marketed by the Contractors. I am convinced that black-marketing has been done in this Case. I will certainly see that necessary enquiry is conducted.

As Mr. Raghava Reddy says, I am not at fault, Sir.

He has just referred about the delay.
Mr. Subba Rao said: There was a suspicion about the cement black-marketing. It is only 800 tonnes, Sir. Out of 1858 tonnes of cement, beneficially 800 tonnes is black-marketed by the Contractors.

I will certainly get it enquired.

Mr. Satyanarayana said: Is it really so? Are 800 tonnes of cement black-marketed? What about the rest of the cement?

Mr. J. Sripada Raju said: The contractors are black-marketing.

Mr. Chandramouli said: The contractors are black-marketing.

SANCTION OF BUS DEPOT AND BUS STATION AT GADWAL TOWN.

S.N.Q.NO. 9962-C : Sri D. K. Satara Simha Reddy: Will the Deputy Chief Minister be pleased to state:

a) Whether it is a fact that a Bus depot and Bus station were sanctioned at Gadwal town in Mahaboobnagar district and foundation stone also was laid;

b) Whether it is a fact that from the original plan of Bus station half the size has been struck off:

c) If so, by whom and under what authority it was done;

d) Whether it is a fact that the bus station much reduced in its size is being constructed with sub-standard material; and

e) If so, action taken by the Government in this regard?

I would request you to ask the Minister to place the plan before the House. If it is not cut to half of its size, I don’t want to make any challenge here, I am sure the Minister will correct his mistake. Under what authority that has been done? The Minister has to review his own answer- Regarding (d) I have personally seen the work. Not only myself but all the people in the town have seen. The Minister wants to say that the work is absolutely upto the standard
I am sorry to say about the sorry state of affairs. I want the Minister to appoint an Expert Committee to go and find out, because officials of arrogance are ruling in the department.

SRI D.K. SAMARASIMHA REDDY: I still stand by what I have said. Original plan as it was sanctioned has been struck off half of its size. The Minister cannot dispute it. Let him produce the original plan. I want the Minister to come to my rescue. Officials are trying to cover up the mischief that had been done. In one breath the Minister says the bill has been stopped from payment. That itself shows that the work is not done up to the mark. It has not been done up to the standard. In the answer he said nothing is wrong.

Mr. DEPUTY SPEAKER: He said he would not pass the Bill if the work is not completed.

SRI D.K. SAMARASIMHA REDDY: It is a serious matter involving some lakhs of rupees. Let an Expert Committee be appointed to see how it is done. I am prepared to take the challenge. I will prove every fact that I have said.

SRI G. SUNDARARAMAIAH (Allur):- Sir, this is an uneducated reply by the Education Minister. He is not educated properly. He would have been educated by the Panchayti Raj Department and he takes on himself a clean sheet of having the full knowledge. My dear Sir, let the Minister withdraw all his reply, because this is contrary to the facts existing there and let it be referred to the Panchayati Raj Ministry. If he is prepared for that, it is well and good. Otherwise let him own the responsibility of correctness of his statement. I can prove on the floor of this House, that his statement is not correct.

I stand by what I said. I took all the pains and got the correct information as quickly as possible.

SRI G. SUNDARARAMAIAH:- Sir it is a privilege issue and the facts go otherwise.

MR. DY. SPEAKER:- Alright, you give it in writing.

SRI G. SUNDARARAMAIAH :- Yes. I will give it in writing.

STATEMENT BY THE MINISTER FOR REVENUE AND POWER

re: Andhra Pradesh State Electricity Employees' Strike.

CHAIRMAN: The Revenue Minister has sought my permission to make an announcement.

THE MINISTER FOR REVENUE AND POWER (Sri N. Janardhana Reddy): Sir, Hon. Member Sri Rajeswara Rao has raised the issue of Electricity Employees' strike. With your kind permission, I would like to make the following statement:

On 30th July, 1982 the Andhra Pradesh State Electricity Employees Union (1104) gave notice of their intention to go on a statewide strike with effect from 2nd August, 1982 alleging that items agreed to between the management and the union were not being implemented. The main issues are:

1) a further revision of the workmen's pay scales as a consequence of alleged revision of the non-workmen pay scales,

2) Payment of a minimum daily wage of Rs. 17.30 paise to all casual and N. M. R. workmen;

3) Payment of incentive for the clearance of revenue arrears. In addition to this, they have also demanded (though it is not there in the agreement) that 6,000 casual workmen should be retained. In fact, this demand has now become a main issue. Apart from this demand which is linked to the daily minimum wage, the other two demands relate to interpretation of the earlier agreement and should be easy to solve given a spirit of give and take.

Notice was issued by the Union and the strike has started on 2nd August, 1982 in spite of efforts made by the management of the Board, Secretary, Energy and myself to dissuade them from such action. However, all necessary arrangements have been made to ensure that consumers are not put to any hardship and that important economic activities are not affected.

The position in regard to the major issues referred to above is as follows:

(i) Field officers of the Board have been engaging people on a casual basis for temporary items of work and such appointments ought to have been strictly need based and should have been terminated as soon as the need ceased. In fact this was agreed to between the Union and the management in the settlement reached on 4-2-1981 at the instance of the then Minister for Power. It was then specifically agreed that casual labour would be disposed with as and when works are completed. The Board however, agreed to maintain a list of such labour having relatively long service and otherwise suitable for regular appointment so that at least some of them could be absorbed in the existing and further regular vacancies. The present demand of the Union is that 6,000 of them should be retained either as regular or casual employees and should not be dispensed with. In this connection I would like to bring to the notice of the Hon'ble Members through you, a very serious consequence of conceding this demand. In spite of control and supervision by the Board, we have reason to think that to some extent the appointment of casual labour in the field might have been made excessively and without reference to the suitability of persons. Any blanket decision to absorb all the existing casual labour would not only result in burdening the Board with unnecessary extra staff but would also result in violating the employment exchange procedure and the statutory rule.
of reservation for S. Cs., S. Ts. and B.Cs. and deny opportunity to other qualified candidates to enter the service of the Board. At the meeting I had with the Union office bearers on 30-7-1982.

I suggested that a team of independent officers from the Government should verify the quantum of such appointments, their justification and eligibility of persons for regular absorption etc. so that we could arrive at the actual number of persons needed for the existing work load of the Board. Thereafter, absorption of qualified casual labour in such clear vacancies would be done by following the rule of reservation. Meanwhile the Board was asked to continue the existing casual labour for one more month. The Union had agreed to this and I had asked them to discuss details with Secretary, Energy. On 31-7-1982 the Secretary, Energy discussed this matter further with the officers of the Board as well as the Union but no agreement could be reached because of their insistence of the Union that at least 6,000 casual labour should be retained by the Board. Even now if the union could agree to the actual manpower requirements as per the norms, absorption of the existing casual labour according to their suitability and by following strictly the rule of reservation, a solution to this dispute could easily be found. In fact, I had even agreed to consider waiving the requirements of sponsorship by the employment exchange in such cases.

(ii) As regards the payment of daily minimum wage of Rs. 17.30 paise to casual and NMR workmen, it is obvious that an agreement to pay such a liberal high daily wage automatically implies the appointment of minimum necessary staff and that the Board could not afford to be liberal both in giving a high wage as well as in retaining surplus people. Such a concession would only result ultimately in the tariffs being raised and burden being passed on to the consumers. It is, therefore, logical that the issue of retention of casual labour and the payment of minimum daily wage of Rs. 17-30 paise should be decided and implemented together.

(iii) The payment of arrear clearance incentive could not be made to all the workmen because the arrears have not been cleared in all the circles. In fact, the Board indicated to the Union its willingness to pay incentives to each circle as and when the arrears in
that circle were cleared. In fact in a few Electricity Revenue Offices it has already been made.

(iv) As a result of the liberal revision of wages for the workmen the differential between the workmen and the non-workmen got disturbed to some extent and the management had to rectify such anamolies. However, the Union maintained that this rectification amounts to a revision of wages for the non-workmen and therefore, the workmen are entitled to another revision of their wages. As it is, the Board has committed itself to an additional expenditure of about Rs. 18.00 crores annually as a result of the recent revision of wages and conceding this demand of the Union, apart from being unjustified, would result in a further heavy financial burden. The Hon’ble Members are aware that as it is the employees of the Electricity Board are much better off than their counterparts in the State Government, and perhaps in other State Government public sector undertaking also. Instead of reciprocating the liberal attitude of the management in agreeing to such an attractive wage structure, the Union ought not to have resorted to a strike without patiently exploring constitutional channels of settlement. Apart from the issue of retention of casual labour, the other disputes mainly relate to interpretation of the agreement and should not be difficult to solve.

As the Hon’ble Members are aware, the legislature, keeping in view the importance of the power sector in the national economy, has thought fit to declare it an essential service and public servants in this vital sector are expected to realise their responsibility and avoid creating disruption in the supply of which would adversely affect not only agriculture and industry but other public service like hospitals, railways, water supply etc. I am sure all the Hon’ble Members will join with the Government in appealing to the workmen to give up their strike and continue their efforts to negotiate with the management in reaching a realistic and rationale settlement on the pending issue.
