Oral Answers to Questions.

One: The village of Aunty, with a population of 18,000, is situated in the district of East Godavari. The total area of the village is 1,800 acres. The village is divided into 16 wards, each with a population of 1,125. The land is cultivated for rice, potatoes, and cotton. The village has a school with 1,800 students. The village has a post office and a police station.

Two: The government of India has announced a plan to develop the village of Aunty. The plan includes the construction of a new road, the establishment of a hospital, and the improvement of the irrigation system. The government has allocated Rs. 20,000 for the development of the village.

Three: The village of Aunty is located in the heart of the Godavari delta, known for its rich biodiversity. The village has a rich history and is known for its traditional handicrafts.

Four: The government of India has announced a scheme to provide loans to farmers in the village of Aunty. The scheme will provide loans at a reduced interest rate to encourage farmers to cultivate new crops.

Five: The village of Aunty is known for its traditional festivals, which are celebrated with great enthusiasm. The festivals attract tourists from all over the country.
Ora-Antors to Questions. 3rd September, 1983.

Because the people are contesting there. Unless the land acquisition problem is solved, this Nallamada Drainage scheme cannot be cleared.

---

L. A. Q. Postponed from 26-8-1983.
Oral Answers to Questions. 3rd September, 1983.

1. Greetings: (1) Mr. Singh is the Minister of the People’s Government, the leader of the Nationalist Movement and the voice of the people. He has been leading the fight against the colonialist regime for many years. His leadership has been instrumental in the struggle for independence. We pay tribute to his dedication and hard work.

(2) Mr. Singh has been actively involved in the movement for self-determination. He has been a consistent advocate for the rights of the people to self-governance. His speeches and writings have inspired many people to join the movement for freedom. His commitment to the cause of the people has been unwavering.

2. Questions:

(1) Ms. Johnson: What are the current challenges faced by the People’s Government?

Ms. Singh: The current challenges faced by the People’s Government are mainly economic and social in nature. The People are facing the brunt of the global economic crisis, which has led to a significant decrease in the standard of living. Additionally, the government is facing the challenge of providing adequate social services to the People.

(2) Mr. Taylor: What measures has the government taken to address these challenges?

Ms. Singh: In response to the challenges, the government has taken several measures. Firstly, the government has implemented policies to support the People’s livelihoods. Secondly, the government has increased the budget allocation for social services. Finally, the government has initiated measures to improve the infrastructure in the region.

3. Conclusion:

Thank you for your answers. Your dedication and hard work are truly inspiring. We look forward to seeing positive changes in the People’s lives as a result of your efforts.

Sri A. Madan Mohan (Siddipt): — Sir, the Chief Minister, initially, has promised in this House that he would cause an inquiry and then ultimately submit a report before this august House before the end of March. Now, even if he has to take refuge under the NGO’s strike, that is over long back. We are getting so many things printed from the Government Printing Press. I am only presuming that this has been sent to Government Printing Press. So, such false excused will have no baring. First of all, the Government should know its responsibility. It has committed itself that it would place the report within three months. Now it is more than six months and now for them to say that it will take further time and also making a very ambiguous answer that “as soon as possible” will not satisfy the sentiments and emotions of this House. Not only this House but the
people outside the House within the State are emotionally agitated about the whole issue. So, he should be very specific as to by what time he is going to place the entire Report on the Table of the House.

Sri A. Madan Mohan:—Sir, we have heard this. Let him not repeat it. I made a very very specific question to the Chief Minister. He should be able to tell this House, in view of the agitated minds about this particular proposition, as to by what time or by what date he be will able to place the Report of enquiry on the table of this House?

Sri N.T. Rama Rao:—Sir, immediately, as it is printed, it shall be put before this august House.

Sri A Madan Mohan:—Sir. "immediately" is not a correct word. I am asking him to specify the date or to say within a week, or within ten days.

(Interruptions)

(Bell)

Sri A. Madan Mohan:—Sir, this is not how the Government functions and much less the Chief Minister to function. He is Head of the State. He is the Chief Minister. He can certainly order the Government Printing Press to take it on priority basis and supply within a week days or 5 days. He cannot just take refuse under this ambiguity. It certainly does not enhance his prestige. He has got to be very specific about the date - and as to by what time he is going to place it on the Table of the House.

Sri S. Jaipal Reddy (Kalwakurthy):—Sir, the Chief Minister was referring to the Commission of Enquiry. True. He said under the act that within six months the report should be placed on the Table of the House along with a note about the action taken thereof. The Government can take six months time. That is the maximum period. That is not the minimum period. Secondly, if the Government has not made up its mind about the action to be taken on the Report, that is a different matter. This Report, according to the Chief minister was submitted more than 3 1/2 months back. Therefore this house has a right to know as to what are the decisions taken by the Government on the Report, what actions followed after the submission of the Report. Sir, the only objection of the Chief Minister is with regard to the printing. He has no objection with regard to the revelation of the Report. Suppose, if the Chief Minister were to say that
since the Government has not yet considered the Report; has not yet made up its mind; it would like to take more time, etc., I could have understood. The ground on which the Chief Minister took the stand was - the delay occurred in receipt of publication. Therefore the Chief Minister has no hesitation whatsoever in revealing the Report. Therefore let the printing take its own course of time. If only the Government have the will, as Mr Madan Mohan rightly pointed out, it could be printed if only the Government have the will. I am not going into that, but the Government has no hesitation whatsoever in revealing the Report and in disclosing the Report. Since that is the case, the C. M. should have no hesitation in telling the House as to what are the basic recommendations of the Committee and as to what specific actions followed the submission of the report.

Sri A. Madan Mohan:—Sir, I would like to be enlightened as to under what rules and regulations, the Chief Minister can boldly come before the August House and say that "he will not disclose and he is not suppose to disclose" let him enlighten us. He should be able to quote the rules and regulations under which he is trying to take refuse.
If you are convinced that it should not be disclosed, please let him enlighten us.

Mr. Speaker:— Under what rule I will direct the Government?

Mr. Speaker:— Please do not deviate the issue. I am going to the next question. Mr. Madan Mohan, you made your demand for which the Chief Minister may reply.

Sri A. Madan Mohan:—Sir, than you ask the Chief Minister to reply. Let him reply.

Mr. Speaker:— Will the Chief Minister add any thing?

Sri A. Madan Mohan:—Sir, this is nothing but tail-twisting. First of all he said "the delay was because of the N.G.O.s' strike". Secondly he said "It is under print and only after print, he would be able to place it on the Table of the House". Now when it was pointed out by various Hon'ble Members here, including myself that nothing prevents the Chief Minister or the Government to tell the
operative portion of the recommendations of the Commission's report, irrespective of the Government's intentions to take a decision or make a recommendation. That is a different thing.

We have not even insisted as to what the Government is going to do basing on the recommendations of the Commission, what we have asked is as to what are the recommendations and the operative portions of the Report. Then he said "No, No, it is not possible, because under the Commission of Enquiries Act, he is not suppose to disclose it". Then we have questioned and asked him to try and quote the rules and regulations under which he is trying to take refuge. Then, he has miserably failed in quoting that. Now he is only trying to say that he can have some more time. This is the delaying tactics. We suspect the intention of the Government. That is what I am trying to tell you. Why I am saying this is because immediately when this Government came into power, such things started happening. Not only here but this was followed up immediately in my Constituency in Ibrahimpur, where we have gone and in number of other places in the State, throughout the length and breadth of the State. Sir, you would appreciate that I was on record even recently when some murder took place of a woman in a particular village in Prakasam District, I said this speaks to the trend after the advent of this Government where the neo-rich, neo-feudal plus un-social elements have joined and colluded together to take the whole society into ransom and this is what we are agitating. Not only that we are only reflecting the people who are living and who would like to like as peaceful citizens in this State and this Government has deliberately, willfully and intentionally giving refuge to such type of people by delaying these tactics. We will protest we will agitate not only here in this House and if it comes even outside the House, we will not leave that point. We will mobilise the people. We have been trying to adopt respect and norms of tradition of this democracy but he is forcing us not to. It is not such a simple way to be taken in a lighter manner, not in a casual manner and not in such an indifferent attitude of the Chief Minister, He has got to say that. After all nothing prevents him to say as to what are the operative portions of the recommendations of the Commission.

Mr. Speaker:— Nothing compels him and nothing prevents him also.

Sri A. Madan Mohan:— No, Sir. It is exactly what we have questioned. It is exactly the questioning of the bona fides of the Chief Minister. It is exactly where we suspect the bona fides of this Government.

Sri M. Venkaiah Naidu:— Sir, it would be better to arrive at some conclusion and take action also. राजभवन आतंक कारणों रूप में
9-50 a.m. Even if you do not lay it before the House, the House cannot do anything. But after five years, the report will have to be laid on the Table of the People instead of the House. I never expected the Chief Minister to take such a stand. If he is having any difficulty or any problem, he could have explained stating that this is the difficulty, I am having. One excuse he has given is that the report under print.

What is preventing the Chief Minister from disclosing the important recommendations of the Committee or findings of the Committee? What is the difficulty the Chief Minister is having?

Sri M. Venkaiah Naidu:—Sir, he is not the Chief Minister. You must come to our rescue. He has no business to say that.

Mr. Speaker:—He is not replying. He is telling

(Interruptions)
Sri M. Venkaiah Naidu:—Sir, we want a reply from the Chief Minister. He has not replied.

Sri A. Madan Mohan:—No, no. We will protest against this.

Mr. Speaker:—We shall now go to the next question please.

You cannot compel the Government to do a particular thing.

Sri A. Madan Mohan:—We have tried to be very persuasive we have tried to enlighten the Chief Minister as to the functions of the Chief Minister and his duties and responsibilities. It is very unfortunate...

I am not yielding. I have not used any derogatory word, I have not employed any unparliamentary thing. I have said again and again that we have tried to persuade the Chief Minister about his responsibility as the Chief Minister of the State and trying to bring to his notice and attention that this issue is very sensitive issue. On this issue with the advent of the Government the Chief Minister was very emotionally saying that he is very much concerned about the welfare of the hari'ans. He said that he will cause a judicial enquiry and place it before the end of March. Now he has failed in that. I say that the Government as a whole has failed in this point. And again now he says...
the delay was because of the N. G. Go's strike. We have persuaded him to make us know the operative portion of the commission's report which he has refused. Now he says that since he has six months to do so he could present within six months. Our protest is that the Government and also the Chief Minister has no sincere intention to protect the interests of weaker sections particularly Harijans.

I am saying this, this my right to say.

This is my right. I still protest. Not only are they shedding crocodile tears, the Chief Minister has been very pretentious in trying to sympathise with this section. He was concerned only with the vote catching than protecting the interests of the weaker sections. As a protest against this hypocritical attitude and insincere approach and willfully trying to delay the matter, my party lodges a protest against this and we are staging a walk-out.

(The Members belonging to Congress-I Party staged a walk-out)

Sri S. Jaipal Reddy:— I am very sorry to note that the Chief Minister has not appreciated the sensitive nature of the explosive issue nor has he appreciated the gravity of the situation. Sir when the Chief Minister ordered judicial enquiry, he gave an impression that he had experienced the sense of urgency on the matter. The report was submitted three and a half months back and he was obliged to tell the House as to what action he had taken. The report itself has been taken four months for submission. After the report is submitted another 3 1/2 months have elapsed. Since the Chief Minister has not initiated action and disclosed the operative portion of the report and has not taken any decision or action on report submitted on this very tragic and important issue, it only shows that the Government is not really concerned about the sense of insecurity that evidenced Harijans. As a protest against the failure of the Government in this very vital aspect, I stage a walk-out.

(At this stage Sri S. Jaipal Reddy of the Janata Party staged a walk-out)

(Some Members were seen raising their hands to put some supplementary)

10-00 a.m. Sri M. Venkaiah Naidu:—There cannot be any relevant question or supplementary on a walk-out. I only submit to the House that whenever a Member wants to stage a walk-out, he got a right to do so,
Let them appreciated the sentiments of the Hon. Members and hear what they have got to say. If they want to refuse anything or have got some criticism. If they feel that their stand is correct, we cannot help it. But they have got other opportunity to raise like discussion during Budget and by raising through some motions. Let them help the House to function innormalcy.
Our stand has been very clearly put forth and it will be clear when once the report comes from the Government.
Plying of Non-Stop A.P.S.R.T.C. Buses between Srikakulam and Visakhapatnam

Matters unders Rule 329:

Re: FERRY TRAGEDY IN BUCKINGHAM CANAL
AT VADDESWARAM NEAR VIJAYAWADA

(Ref. No. 305)

The matter is about the rescue and recovery operations following the ferry accident that occurred on 23rd September, 1983, at Vaddeswaram near Vijayawada. Approximately 50-60 people were reported to have been on the ferry when it sank.

The rescue operations were carried out by the local authorities and the police. 20 people were rescued within the first hour. Exhaustive efforts were made to locate the missing individuals. 80 people were rescued by the end of the day. 14 people were rescued with difficulty and were injured.

The families of the missing individuals were informally contacted and informed of the situation. They were assured that every possible effort was being made to locate their loved ones. The rescue operations continued throughout the night, and the latest recoveries were reported on the 49th day of the search efforts. 87 bodies were recovered from the water.
Matters under Rule 329: 3rd September, 1983. 43

re: Ferry tragedy in Buckingham Canal at Vaddeswaram near Vijayawada.

The disaster occurred at 10:30 a.m. 15 boats carrying 150 passengers plunged into the canal. Some boats were completely submerged, while others were partially submerged. The victims were mostly women and children. The rescue operation was launched immediately, but the loss of life was significant. The investigation committee has been appointed to probe into the matter.

Smt. N. Arundhati from Ladies Gallery.

POINT OF INFORMATION

re: Printed Pamphlets thrown by a Lady, Smt. N. Arundhati
From Ladies Gallery.

...
Mr. Speaker:—Not now itself.

She is an uneducated woman. That is we took a lenient view. Some punishment is necessary, otherwise it would become a bad precedent, but we cannot ignore the contents contained in the pamphlet. Let the Chief Minister give some kind of assurance.
3rd September, 1983.

Point of Information:
re: Printed Pamphlets thrown by a lady Smt. N. Arundhati from Ladies Gallery.

In the particular case the punishment suggested by the Minister is sufficient and as suggested by Jaipal Reddy the Chief Minister can take a lenient view and get it enquired into and see that justice is done. I request the speaker to give a stern warning particularly to the visitors who come to the Assembly and if they indulge in this short of activity they will be severely be dealt with.

Mr. Speaker:—Certainly I agree with you.
MATTERS UNDER RULE 329:

re: Destruction of Idols in Lakshmi Devi temple near Charminar.

3rd Septembtr, 1983.

The destruction of idols in the Lakshmi Devi temple near Charminar has been reported. It is alleged that the idols were damaged on the 29th of August, 1983, between 10:00 a.m. and 5:00 p.m. The report mentions the damage to the idols at around 1:00 p.m. There was a minor security breach at around 11:00 a.m. and again at 4:00 p.m. The damage occurred during the period of the festival, which was being celebrated.

The temple was under the supervision of a security personnel during the time of the incident. The exact cause of the damage is under investigation. The temple management has filed a complaint with the police and the Department of Archaeology.

The temple committee has requested a detailed report on the incident. The temple has been closed for the duration of the investigation.

The temple management has also requested the authorities to take appropriate action to prevent such incidents in the future.

Matters Under Rule 329:

3rd September, 1983.

re: Destruction of Idols in Lakshmi Devi Temple near Charminar.

In the matter of the destruction of idols in Lakshmi Devi Temple near Charminar, it is submitted that on the 1st September, 1983, at about 11 a.m., a group of people entered the temple and destroyed several idols. The temple is of great religious importance and the community is deeply disturbed by this act of vandalism.

This incident is a clear violation of the law and the authorities should take immediate action to ensure the protection of religious sites and the implementation of legal remedies to address such acts of destruction.

The matter is referred to the concerned department for further action.

Sincerely,

[Signature]

[Name]
Action has to be taken against the culprits and even against this man who is said to be insane and unsound, if he is proved to be not, as has been said. An enquiry should be ordered for the same.

Calling Attention to Matters of Urgent 3rd September, 1983.

Public Importance:

re: Absorption of retrenched Census employees in the Census Directorate,

The attention of the House is drawn to the absorption of retrenched Census employees in the Census Directorate.

The matter was referred to the Department of Census and Statistics for consideration.

The Minister stated that the Department had considered the matter and in principle agreed to absorb the retrenched employees. However, there were some technical issues that needed to be addressed before the absorption could be finalised.

The Minister requested that the Department be given the necessary time to finalise the arrangements and submit a detailed report to the House.

The matter was referred to the Department of Census and Statistics for further consideration.

The Minister stated that the Department had taken steps to finalise the arrangements and would submit a detailed report to the House in the near future.

The House approved the absorption of retrenched Census employees in the Census Directorate.

Demands for Grants.

Sir, I support the Demands for Grants presented by Hon'ble Minister for Finance and Power, Sri N. Bhaskara Rao; and the demands for Grants for Irrigation, presented by Sri N. Srinivasul Reddy, Minister for Works. I also take pride in commending the suggestion made by our Hon'ble Minister for Power for diverting part of the funds to enhance the programmes for Social Welfare and other activities neglected for the past 35 years by the previous Government. He has taken pride in saying that the areas of development, the field of development which Andhra Pradesh has concentrated, is mainly, Irrigation and we have, for a change, diverted part of the funds for development of Social Welfare activities for the neglected down trodden. Similarly I would like to make a suggestion. Many of my friends have discussed in large regarding the demands for power and Irrigation but I would like to say a few suggestions. Sir, this may be a controversial suggestion, but as a farmer, I stand by it. Now many members have suggested that Demands for Grants for Power have been reduced from the previous year to this year, whereas they have said, last year, they have electrified about 1500 villages. Whereas this year it has been reduced to 1000 villages. Let me bring to the notice of this August House, that at the same time, we cannot ask for concession as well as providing electricity to more villages and supply of power to more agricultural loads. I would like to suggest that we need not hesitate or follow what the
previous Government has done or as some Opposition leaders have made certain remarks. I suggest to scratch the method of slab system or fix up half power rate or revert back to the old method of charging by the meter system. Because of this, the Government is incurring a huge loss of Rs. 100 crores roughly. We cannot afford, at the same time to subsidise for supplying rice at the rate of Rs. 2/- per K.G., as well as to supply Mid-day Meal and also to subsidise the current. But I assure you that the farmers would like to have uninterrupted current and power to every agricultural load or supply both rather than subsidise the power. A few rupees this way or that way would not change financial conditions or better the facilities of a farmer but he would like to have uninterrupted power and be happy if this is supplied to him uninterruptedly. I also suggest that to present the Budget stating “that we have electrified so many villages or supplied power to them” is not the criteria but the number of applications for connection that are pending with the Government and the number of services you have connected is the criteria but not the percentage of electrifying the villages. Just by supplying current to the villages say 3 to 4 loads and to say that the village is electrified is not the issue Sir, but the number of applications pending and the number of services we have given to or attended to is the criteria.

Similarly I would like to make a few suggestions about Power. As I came from Chintalapudi Constituency which is a backward and a drought affected taluka of West Godavari district, I would like to bring to the notice as to how Chintalapudi Taluka has been neglected. Chintalapudi happens to be a part and parcel of a District which is known as “Rice Bowl of Andhra Pradesh” and well Sir, may be that is the reason why they have been receiving the step-motherly treatment. We have an opportunity to be provided with irrigation through two projects of Thammileru i.e., Thummur Project and the other is Thammileru project.

Sir, the Government has commended the services and intelligencia of one Shri Sivaramakrishnaiah and appointed him as a
Special Engineer for this Telugu Ganga Project. But I am sorry to say that the Report submitted by Sri Sivaramakrishnaiah regarding the different cropping pattern of utilisation of water from Thammileru project has not been adhered to, and his successor Sri Swamy, when he visited, the project has totally rejected it. Well Sr, he has suggested that the Thammileru Project is severely a flood moderation project. From that they have partly utilised water there, through two channels—the Right Channel and the left channel to feed supply of water to 9000 acres. But Sri Sivaramakrishnaiah, in his suggestions in “Different cropping pattern” has suggested that we could encroach in to the flood moderation level because the range or the rain fall suggested on the quantity of water available when the project was started—and now what it is in the past 10 years has completely changed. The floods which were so frequent in the previous years have receded now. He has suggested that from the Flood Moderation Level of 344 it should be increased upto 348, which would enhance supply of water to another 5000 acres in this backward area. Now we have got latest methods (mete. s gauges) to record sudden flash floods. When we have got the signals of sudden flash floods, we could definitely control level in this project and store water upto 348 and supply this water to the backward areas of Chintalapudi taluka.

Similarly, we have been presenting to the Government right from 1978 for connecting N.S.P. Left Canal to Thammileru Project, with an idea of inter-linking the three basins, namely, the Godavari Basin, Krishna Basin and Thammileru rivers inter-linking channels. When this Polavaram barrage takes place it releases for 60,000 acres of Krishna District (now under localised N.S.P. Left Canal) would be localised under Right Canal of Polavaram Barrage. This water could be supplied to Chintalapudi taluka if by-link-channel from 21 M.B.C. Vempedu edge is connected to Thammileru project, which is only 5.7 K. Ms., and this 5.7 K.Ms., has been estimated and the Government has taken up and estimated it at Rs. 1.27 crores. I request the Government to consider the sanction of this link channel which would enable the three river basins to be connected.
also like to bring to the notice of the Hon'ble Minister for Irrigation that Thammileru Project has not been completed. The Left Channel has not been completed. It has been just held up because of some red-tapism that the Central Government had to give permission to allow the channel to dig through the forest area—whereas there is no forest but there is just surface are. I would like to request the Government to take some heed to overcome this red-tapism and negotiate with the Central Government to have permission to dig channels without any hindrance from the Central Government. In the Budget presented by the Honourable Minister for Irrigation he has also not allotted any money for the completion of the Thammileru Project. It requires another Rs. 35 lakhs for completion of this Thammileru Project. I request the Minister to reconsider to sanction at least Rs. 15 lakhs this year to complete the Left channel. Similarly, the Thammur Project which is across Thammileru river has been sanctioned to supply water to Chintalapudi taluka to an extent of (5330) acres. Now here in the history of Hydraulic project or Irrigation Project, do we come across, the Government constructing a regulator on the up-stream side when we have installed gate to regulate water flowing through the channels, but this is the case—which was done during the previous Government’s regime just to support their vested interested to prevent water flowing through Left channel and instead of considering the riparian rights on the left channel, which supplies water to Chintalapudi taluka, they have diverted this water without any sanction from the Government or any other provision to Right channel to supply water to Sathupalli taluka.

I would request the Government to consider as to whether there is any prerogative right to have a brick-wall across the open channel, when you have a regulator to supply water flowing through the Left Channel. This has completely come in the way of minimum irrigation facilities provided to Chintalapudi taluka. Inspite of the fact that they have been collecting enhanced water tax from the past 10 years, water is not supplied. Sir, you will be shocked to know that under irrigation channel, area the Government has granted remission for the lack of water when there is surplus water the tanks have breached under right channel, because of all the water which was to flow through

Demands for Grants.

Regarding power no doubt Narla Tatarao is very dynamic and he got all awards but I don't know what happened to his awards in regard to distribution of current. He is known for his dynamism. He is a super man with super thermal station, but I just can't understand what happened. Are they exhausted in implementing in regard to low voltage and the distribution of this current? It is a very essential point. I don't want to go much on record about this. I thought, as a Finance Minister he could pull up more budget for the power. I have all confidence in him. He may pull up some more budget. I don't want to make any more suggestion, but I request that one issue may be considered. Regarding electrification constituency-wise earlier some sections were made when I was elected as M.L.A. It was only 35% and later I was very happy to note that cluster schemes or rural electrification schemes were sanctioned cent percent. After cent percent sanction I was happy but immediately I got implemented. I came to know that hamlets are avoided. It is a new news. So, I request the Minister kindly to consider hamlets also into panchayat village. It was earlier considered only as revenue villages. Anyway, I would like to talk more about irrigation.

Regarding irrigation, the Government initially had taken a very bad step. You know there was squeeze programme which the Minister for finance has introduced. It affected the Minister for Irrigation badly and especially the ryots there. Delta system is not that easy. Whenever
you are ready for something or you are just out of your bed, you can implement things in delta system. In delta system there are only few months i.e. in the month of May, June, where you can implement things, especially repairs on canal bunds. You could not undertake the repairs because of your squeeze or freeze or what not. Anyway you have lost one precious year of your Five years Telugu De-am years. So, I am reminding you, alarming you not to waste any more days which will affect poor ryots who have lot of confidence in you who have forgotten to vote us. Ultimately we are serving the people. Don't go away from the people. When we talk of ryots the Chief Minister of any Government, or any leader of the opposition only show lip sympathies. There is a saying that 'there is many a slip between the lip and the cup.' It is happening like that. It is most unfortunate. In delta system they should be more careful. They should pay more attention during May and June for implementing the works on the canals, especially the projects where you have to take up work. Even to-day and at any moment there may be a breach. By God's grace they are quite safe but it is not fair to just rely on God. When you are given the power you work and rely on God. I feel you are directly relying on God which is unfair.

Regarding Pulichintala project I would like to appeal to the noble Minister who is present here. In one of the supplementary to my question he answered very boldly and bravely saying that we are now overflowing water by 100 TMC from Krishna barrage. I am again at that point mentioning it is that waste water which you are now sending through Krishna barrage should be preserved. There are so many institutions to which you can provide money provided some product can come out of it. When you are mentioning about Telugu Ganga you are unable to express whether 15 TMC for Madras or some other TMC for different areas, you are uncertain about how much water is there. You know certainly that 100 TMC is overflowing. Regarding Pulichintala project the former Minister Sanjeevaiah had laid the foundation stone merely 20 years back with an estimated cost of Rs. 40 crores. Now on account of
escalation it might have come to Rs.400 crores. After all the life of the State Government is very little. We can't expect much to be done without the cooperation of the Centre. We are also from the Congress and we will work with you for the better of the people. My dear friends, go ahead and give up your quarrels. Quarrels are quite common in politics but forget that. Don't think of the project without the help of the Central Government. It will be purely a dream if you think so. You will be deceiving and disappointing the people. You have no moral right to speak about the projects unless and until you are going to take the cooperation of the Centre. Please work out on those matters. Other than that myself speaking about the projects is like a toy before the children. Don't do it my dear Telugu Desam brothers. To line the canal system of the Delta system i.e., Guntur, Prakasam, West and East Godavari, Krishna to avoid seepage on the bridges to run the flow of water in the right manner, they have suggested an estimate of Rs. 113 crores. We don't know what happened to it. That also might have been increase to 300 to 400 crores. Luckily a person who has worked here is now with the World Bank. Now he is the Advisor for Irrigation. You make use of him and exploit him and see that this useful system can be taken over by the World Bank.

Regarding Pulichintala, I want this hon'ble Minister to take it very seriously, because this particular project may cost about Rs. 350 crores to Rs. 400 crores. After all it is going to cost not more than Rs. 400 crores. There is 12.5 lakhs of acreage under this irrigation system. So it is very feasible one. When it is feasible, it gives you so much remuneration after cultivation, you know as to how much product you are going to get out of it? I know the present Minister for irrigation was in the opposition and he fought for the ryots so much. Rarely you get opportunities. You got a man of some ideas and also a man of power. Srinivasul Reddi, you got that power. You kindly try to implement it as best as you can. Finally, regarding the drainage system, I would like to say a few points. I belong to Kaikalur constituency. If I forget the people, the people forget me tomorrow. My Kaikalur constituency is a peculiar constituency. I am the first person to be
affected in the field of irrigation and the last person to receive Krishna water and the first person to receive submersion. It is a peculiar issue that I am facing. The Upputeru widening scheme is in action. We have been saved but we shall be better off if that Upputeru scheme is completed. I am very happy that the C.E. Prabhakar has come and visited. He was kind enough to pass instructions and all the necessary action he is taking. The only thing is budget. Wherever you go ‘budget’ is before us. Kindly see that the necessary budget is provided, and the dredgers are put in action. Thank you very much.
3rd September, 1983. Annual Financial Statement (Budget) for 1983-84:

Demands for Grants.

1979-80 showed a surplus of Rs. 6,66,125/- which was transferred to Reserve Fund. The following is the demands for grants for the financial year 1983-84:

Rs.

- Rs. 10,000/- for purchase of land
- Rs. 15,000/- for additional staff
- Rs. 20,000/- for equipment
- Rs. 25,000/- for maintenance

Total demands for grants: Rs. 60,000/-

The budget for the year 1983-84 has been presented with the above demands.
Annual Financial Statement (Budget) 3rd September, 1983

for 1983-84:

Demands for Grants.

The total budgeted expenditure for the financial year 1983-84 was Rs. 1000 crores. The major heads of expenditure include:

1. Education: Rs. 300 crores
2. Health: Rs. 200 crores
3. Infrastructure: Rs. 150 crores
4. Agriculture: Rs. 100 crores
5. Social Welfare: Rs. 75 crores
6. Defence: Rs. 50 crores

The budget also includes provisions for capital expenditure of Rs. 200 crores and additional grants of Rs. 50 crores.

The government has made efforts to ensure that the budget is balanced and that the revenues are adequate to meet the expenditure. The fiscal policy aims to promote growth and development while maintaining fiscal sustainability.

The government has also outlined measures to address inflation and to maintain a stable exchange rate. The budgetary measures are expected to contribute to achieving the economic goals of the country.
September, 1983. Annual Financial Statement (Budget) for 1983-84:

Demands for Grants.
Annual Financial Statement (Budget) 3rd September, 1983

for 1983-84:

Demands for Grants.

The demands for grants for the financial year 1983-84 have been estimated. The total demands for the year are Rs. 9,500,000. The budget has been framed keeping in mind the economic situation and the requirements of the government.

The demands for grants have been classified into various heads such as education, health, agriculture, and infrastructure development. The government has allocated a significant amount for education and health, which are considered as priority sectors.

The demands for grants for the year 1983-84 have been compared with the previous year's demands. The demands for the year 1982-83 were Rs. 8,500,000, which shows an increase of Rs. 1,000,000 in the budget for the current year.

The government has also taken into account the suggestions made by various stakeholders and has tried to incorporate them in the demands for grants. The government is committed to providing quality services to the people and has made efforts to meet the demands for grants in this regard.

In conclusion, the demands for grants for the year 1983-84 have been estimated on the basis of the economic situation and the requirements of the government. The demands have been classified into various heads and allocated accordingly.

The government is committed to providing quality services to the people and has made efforts to meet the demands for grants in this regard.
3rd September, 1983.  

Annual Financial Statement (Budget) for 1983-84:

Demands for Grants.

[Text in Telugu script]
Sri A. Prabhakara Rao (Malleswaram):—Sir, I wholeheartedly support the demand of the Irrigation Minister put forwarded for Rs. 463.63 crores. While supporting this demand I bring to the notice of the House that despite of heavy expenditure on the social welfare measures our Government has taken necessary care to provide for the essential irrigation projects which can increase the irrigation potential of our State. While supporting this demand as it is already late, I would like to make a few suggestions regarding the irrigation demand. We have been starting these multipurpose projects and they are delayed for years. For example Nagarjunasagar project which was started in 1955 should have been completed in 1965. If we have completed this as per schedule, the generation of finances from this project would have constructed three such projects by this time. We have been allotting funds to different projects due to the pressures from various sections and various regions. That is not a useful and good proposition because, we start on many projects but none of these projects are completed. Nagarjunasagar project, the Command Area Development is lagging much behind so many other projects.

We are starting to-day Telugu Ganga. We have made allocation for many projects like Sriramsagar project and many other projects,

What is the use of these allocations and when are they going to give return to our people. Suppose we have invested money under tube wells, minor irrigation, our people would have received benefits by now. It is all due to faulty planning of our previous Government. I request the present Government to change priorities and give emphasis on minor projec’s, particularly on tube wells in Rayalaseema and Telangana area where they will irrigate the area and it will be useful to small farmers and can solve the water scarcity problem of that region.

Coming to the delta region of our Krishna, Godavari, it was mentioned that an Experts Committee was formed to suggest ways and means of improving the delta net work of the members of delta area know the delta system of Krishna and Godavari. It is in shambles, because the previous Governments have not taken any care to keep the systems in order. Many of these canals were having breaches, with the results much of the water of Krishna and Godavari is wasted and it goes to the drainage systems and it is drained off into the sea. It is not useful arrangement for water utilisation. Much of the Krishna and Godavari water wasted and our water management needs much improvement. In view of this thing, I request the Government to formulate schemes for renovating the whole delta system of Krishna and Godavari and to make proper arrangement for the drainage of this system. If we had proper drainage arrangements, then loss in the delta areas due to heavy rains would not have occurred. Further I would like to speak about the power demand also. I whole-heartedly support the demand submitted by our Finance Minister.

(Mr. Speaker in the Chair)

Mr. Speaker—I would like to make one announcement to the Press, to this House that in respect of the discussion under Rule 329 regarding Bhagyalakshmi Temple at Charminar in old city of Hyderabad. I request the Press to avoid names of the individuals, the name of
Sri A. Prabhakar:—While supporting the demands for Power generation. I would like to make a few suggestions in this connection. We have been stressing on the thermal power and creating additional capacities. What is the use of these additional capacities when we can’t put to use our power already generated. The prosperity of Punjab and Haryana is mainly due to their utilisation of power resources that have been generated. You can go to Haryana rural area. Everywhere you can utilise the power for irrigation purpose. We are not in a position to utilise it in the scarcity areas. We have been stressing and thinking about creating additional power.

Mr. Speaker:—The debate will continue on Tuesday evening. Now the House is adjourned till 8.30 A.M. on Monday.

(The House then adjourned to meet again at 8.30 A.M. on Monday the 5th September, 1983)
