SRI N. INDRASENA REDDY: Sir, under rule 47, it should be posted only after the question-hour. Postponed question has to be posted only after regular ten questions.

MR. SPEAKER: This is as per the decisions of the Business Advisory Committee. We have decided that because it is a postponed question, it is within the scope of ten questions only he is asking. Do you mean to say that hereafter we should refer to postpone a question? This is the decision taken at the BAC and accordingly we are following. That is all.

MR. SPEAKER: I am amenable to reasoning.
MR. SPEAKER: That I will see.
As regards the next question, Sri Indrasena Reddy has raised a legal point. I will look into it if really what he says is right, I will postpone it.

Question No. 150 was postponed.

Matters Under Rule 304.

Arbitrary Conversion of Green Ration Cards in to Yellow Cords.

Arbitrarily, the Green Ration Cards have been converted into Yellow Ration Cards. According to the Department records, 29,411 Green Cards have been converted into Yellow Cards. The total number of Green Cards originally issued was 11,574. The difference, i.e., 17,837 Green Cards have been converted into Yellow Cards. It appears that a large number of Green Ration Cards have been converted into Yellow Cards without any proper authorization or justification.

The Representatives of all the Political Parties and the Andhra Pradesh Government unanimously agreed that Sri sailam Left Branch canal shall be taken up and the left Branch of Left Bank Canal, which irrigated about 2,75,000 acres in Rayalaseema.

"The emphasis is that Andhra Pradesh shall not occupy any right, whatsoever, for claiming future right based on the
continued usage of surplus water. It is rightly so, what we need is to use the surplus water to the extent available and we shall not claim any right or make claim for such utilisation at any time in future.

“To adopt the system of surplus rotation would secure the benefit of irrigation to as much area as possible. By this system, perhaps the farmer may lose some crops also.”
Nothing in the order of Tribunal shall impair the right, power or authority of any State to regulate within its boundaries the use of water, or to enjoy the benefit of water within the State in a manner not inconsistent with the order of this Tribunal.

Mr. Rajiv Gandhi, Prime Minister of India, wrote a letter to the Chief Minister of Karnataka as under:

"The Chief Minister of Andhra Pradesh however feels that he being the last riparian State, before the river enters the sea, there should be no objection by any state to the excavation of the project...

I suggest that the Karnataka Government to examine the project so that the problem can be solved in a manner beneficial to both the States."

We are very happy to know that the Chief Ministers of Tamil Nadu and Andhra Pradesh are laying the foundation stone for Telugu Ganga Project on 27-4-1983. It is taking up, consequent to the agreement between the above two States, to provide water to irrigation to drought-prone areas in the districts of Rayalaseema and Nellore district.

re: Telugu Ganga Project

12th March, 1986

SRI K. Vidyadhara Rao:—

Sir, much has already been said on Telugu Ganga and the Telugu Ganga project. When there are certain facts, I would like to highlight one or two to this august House through You. We have seen people talking about that water has been provided to Telugu Ganga by means of rotation only and not through assured water but it is only through excess water. I would like to pose one question to the august House. People are raising objection through they themselves accepted that there is excess water of 332 TMCs. Where is the question of saying that there is no assured water to Telugu Ganga? If you see the way how Bachawat Tribunal Award has been apportioned, you will clearly understand that only 75% of dependability has been taken into consideration. That clearly shows that within hundred years the project in Krishna basin in Andhra Pradesh will face scarcity of water. That means in twenty five years there may not be water for this project too. So, there is no question of thinking that only Telugu Ganga will fall short of water.

It has been clearly accepted by both Sri Sankaranand and Sri Veerappa Moiley and others who are now browbeating about this project and creating hindrance for the clearance of the project. On the day of inauguration clearly brochures were distributed to all the Chief Ministers present in front of all those who were present at that meeting. In these brochures it was clearly shown about the intentions of the project, clear-cut designs, the quantum of water, that was to be utilised etc. No objections were raised then by Sri Moiley. May be, he was busy with his so-called tape scandals rather than in the interest of the State.

All of a sudden he found that Karnataka is losing because of Andhra Pradesh going ahead with Telugu Ganga project. As one of my friends just now said that not taking into consideration the political motives, it has been clearly proved that the pre-
Previous government have neglected the dry areas of Rayalaseema—drought prone Rayalaseema. It is good that he has accepted a naked truth. That is why this Government with a clear cut intention is interested in coming to the rescue of the drought prone areas of Rayalaseema and is taking up this project to be implemented at any cost. Having accepted the fact that there is excess water, and Andhra Pradesh has right to utilise the excess water Mr. Shankaranand when discussions came in the Lok Sabha and Rajya Sabha tried to evade answers by side track ng the issue and not answering direct questions. Now, if you come to the crux of the point, we can clearly see that there is 332 TMCs of excess water of 2,060 TMCs which has been guaged at Jurala, Srisailam, Nagarjunasagar and Vijayawada. If you consider that other States have a share in this, we can clearly see that out of 2060 tmc we have a right to utilise 25% of the excess water. This 25% of 330 TMCs meets the requirement of 29 TMCs for which Telugu Ganga is designed to hold.

If you come to the point of objections now raised regarding the extent of catchment area of Krishna river in Karnataka, Maharashtra and Andhra Pradesh and also the other objections which are now raised by the Hon. Members of Karnataka and Maharashtra that Andhra Pradesh cannot divert this water, cannot construct new projects, all those points have been considered at the time of Bachawat Tribunal Award and were clearly rejected. Bachawat Tribunal has categorically stated that they have no right to question the right of Andhra Pradesh in utilising excess water. Where is the point in raising the question again? Once a Tribunal has given its award, no government or political party or leader has a right to question it. On the day of inauguration the Prime Minister has said that "Telugu Ganga is a clear cut example of national integrity." Now, where is the question of re-opening this award? Now the question that the Hon. Chief Minister is not prepared to attend any meeting arranged by Government of India along with the other Chief Ministers does not arise. Where is the question of again re-opening or re-questioning or re-discussing the judgement once an Award is given by a highest body of the status of Supreme Court? Is there any possibility to re-open the judgement, I would like to question.
Where is the question of anybody trying to talk what you call political.

SRI V. RAMABHUPAL CHOWDARY:- One clarification.

MR. SPEAKER : You can seek clarification after the Minister makes his speech.

No it is not good. Thoughts will break and he will not be able to stress. Anyway, time is over. Mr. Vidyadhara Rao you might finish in another two minutes.

SRI K. VIDYADHARA RAO :- Regarding the clarification that only if there is any assured water for the project clearance will be given, I do not find any scope for that because twenty five objections were raised by a High Power Commission which were all answered by the Government and Irrigation Department. No question was raised regarding assured water or excess water. so this question of the project getting clearance only from excess water does not arise at all.

Once again, I appeal to the Hon. Members. Let us not make a political issue now that you find you have got faith among the people and just trying to get hold of political platform and making the Rayalaseema issue and then claiming that you would not bring politics in to the picture is not right. As many Opposition leaders have said, in the interest of the State let us fight for the project unitedly and see that we accomplish the project at the earliest. Let us bring pressure upon the Central government to give clearance to all the projects so that we can achieve our aims.

SRI V. RĀMĀBHUPAL CHOWDARY :- Regarding Bachawat Award, the Hon. Member is stressing....
MR. SPEAKER :- Not necessary. The Hon. Minister is there to give answer.

SRI V. RAMABHUPAL CHOWDARY :- Sir, it is relevant. While the Award permitted the use of surplus waters by Andhra Pradesh, it has also said; ‘Andhra Pradesh shall not secure any right in the use of surplus waters’. So, it does not accrue any right.

"Mr. Hegde stated that under the Bachawat Award, Andhra Pradesh can use surplus water flowing through the river till 2,000 A.D. The State’s stand has been made clear to the Centre and to the Members of Parliament. Courts could not give any Stay to the project."

[Partial text not legible]
SRI G.V. SUDHAKARA RAO :- I want to add one more point. To-day the controversy is not only about Telugu Ganga but it is a question of total availability of water to be distributed between Telangana and Rayalaseema -- through the left canal to Telangana and left branch canal to Rayalaseema. I wanted to know how much total quantity of water the Government wanted to allotate from Srisailam and how it is distributed between the Telugu Ganga and Rama Rao canal.

Mr. V. K. Suresh Reddy :- As you know, the amount of water to be allotted from Srisailam would be 44 lac cusecs annually. We in the Congress believe in distributing the water equally between Telangana and Rayalaseema. According to our calculations, 34 lac cusecs would go to Telangana and 10 lac cusecs to Rayalaseema. It is on this basis that I am asking Mr. G.V. Sudhakara Rao to give us a clear picture on the distribution of water from Srisailam.
SRI G. V. SUDHAKARA RAO: - I asked how much water you are going to utilise under Srisailam in the name of surplus water—the canal and the regulator?

Sir,

The subject matter relates to the alleged misuse of a substantial amount of funds by the Engineering wing of Sri Venkateswara University. It appears that funds intended for academic purposes have been diverted for personal benefits of certain individuals. The accused have been aware of the misappropriation yet have failed to report it to the appropriate authorities. It is imperative that such actions are reported to ensure the accountability and transparency of university funds.

The details regarding the misappropriation are as follows: [Additional information can be provided here.]
