ORAL ANSWERS TO QUESTIONS.

CHAIRMAN: Question No. 41 is postponed at the request of the Member.

* An asterisk before the name indicates confirmation by the Member.

[615]
(b) whether it is also a fact that these funds are exempt from Audit and accountability and if so, how the Government propose to control the misuse of these funds; and

(c) whether it is a fact that the amount now paid to the Police informants is not creating the incentive to the required level?

Supply of Wax

*1504—Q—Sri M. Gopala Krishna (Kakinada): Will the Minister for Small Scale Industries Textiles, Commerce and Marketing be pleased to state:

(a) whether it is a fact that items like Coal, Paraffin Wax are being distributed to small farmers and cottage industries by various corporations in our State; and

(b) if so, will the Government consider to distribute these materials by a single organisation in the State to avoid unnecessary expenditure?

Oral Answers To Questions

SRI BASHEERUDDIN BABA KHAN (Bodhan): Over and above 30% overhead charges, the cost of transportation of coal is also very high. Does the government propose to reduce the overhead charges as well as transportation cost? Even the quality of coal that has been supplied to the farmers is not satisfactory. What does the government propose to do?
Oral Answers To Questions
14th March, 1986. 619

Q1. Mr. Ramaswamy: Madam Speaker, some time back, the Hon'ble Minister for Food, Public Distribution and Civil Supplies had given a statement that the food grain surplus produced in the 1985-86 crop season would be utilized to the extent of 53 per cent. Please make a statement on the utilization of the food grain surplus so far?

Mr. Speaker: Hon'ble Member, on the question of the utilization of the food grain surplus in the 1985-86 crop season, we have made efforts to utilize 53 per cent. The utilization of the surplus till now is 43 per cent. We have utilized 160 crores of rupees. The utilization of the surplus so far is 43 per cent. The Hon'ble Member may kindly look into the matter in this regard.

Q2. Mr. Shekar: Madam Speaker, the Hon'ble Minister for Food, Public Distribution and Civil Supplies, in his statement on the 14.5.86, had mentioned that the Hon'ble Minister had also spoken on the same. I would like to draw the attention of the House to the statement made by the Hon'ble Minister that he had assured the House that the Hon'ble Minister was informed of the matter?

Mr. Speaker: Hon'ble Member, the Hon'ble Minister had assured the House that the Hon'ble Minister was informed of the matter. The utilization of the food grain surplus so far is 43 per cent. The Hon'ble Member may kindly look into the matter in this regard.

Q3. Mr. Sreenivas: Madam Speaker, I would like to draw the attention of the Hon'ble Minister for Food, Public Distribution and Civil Supplies to the importance of the Hon'ble Minister for Food, Public Distribution and Civil Supplies as the Hon'ble Minister for Food, Public Distribution and Civil Supplies had assured the House that the Hon'ble Minister was informed of the matter.

Mr. Speaker: Hon'ble Member, the Hon'ble Minister had assured the House that the Hon'ble Minister was informed of the matter. The utilization of the food grain surplus so far is 43 per cent. The Hon'ble Member may kindly look into the matter in this regard.

Q4. Mr. Chandrasekhar (Karnataka): Madam Speaker, I would like to draw the attention of the Hon'ble Minister for Food, Public Distribution and Civil Supplies to the importance of the Hon'ble Minister for Food, Public Distribution and Civil Supplies as the Hon'ble Minister for Food, Public Distribution and Civil Supplies had assured the House that the Hon'ble Minister was informed of the matter.

Mr. Speaker: Hon'ble Member, the Hon'ble Minister had assured the House that the Hon'ble Minister was informed of the matter. The utilization of the food grain surplus so far is 43 per cent. The Hon'ble Member may kindly look into the matter in this regard.

స్థిరంగా ప్రశ్నలు. అది ప్రత్యేక సంబంధం కలిగిన రాగించేది దిగువకు, అది సిద్ధ ఉంటే. తదే అడిగా పిచ్చి పంచాయతి, రెండు తరువాటుల ప్రతి పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి. కింద ప్రతి పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి.

ప్రశ్నాంశాలు సూచించండి: ఈ కారణానికే విధానానికి ఆధారంలో ఉన్నతి ప్రదానం చేయబడింది. యొక్క సందర్భానికి ప్రశ్నసమీకరణ నిర్ణయాల ప్రక్రియలు ప్రారంభించబడింది. విశేషానికి, ప్రత్యేక పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి.

ప్రశ్న 1. సంస్థానానికి (మంత్రివర్చు): ఎందుకంటా వాడుక పైగా జీవనం కలిగి ఉండడానికి సమయం ఉంది. యొక్క ప్రతి పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి.

ప్రశ్న 2. మంత్రివర్చు: ఎందుకంటా వాడుక పైగా జీవనం కలిగి ఉండడానికి సమయం ఉంది. యొక్క ప్రతి పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి.

ప్రశ్న 3. మంత్రివర్చు: ఎందుకంటా వాడుక పైగా జీవనం కలిగి ఉండడానికి సమయం ఉంది. యొక్క ప్రతి పంచాయతి పంచాయతి అధికారాలు, క్రమానుసారం వాడుక పైగా జీవనం కలిగి ఉండాలి.
Oral Answers To Questions 14th March, 1986

BAN ON LEASE OF GRANITE QUARRIES

*2034 Q.— Sri G. Nagi Reddy (Dharmavaram): Will the Minister for Mines be pleased to state:

(a) whether it is a fact that there is ban on leasing out granite quarries;

(b) if so, whether there is any proposal before the Government to lift the ban; and

(c) whether this ban will apply to all granite quarries in addition to black granite?

Sri M. N. Reddy (Dharmavaram): —

(a) It is a fact that there is ban on leasing out granite quarries.

(b) There is no proposal before the Government to lift the ban.

(c) This ban will apply to all granite quarries in addition to black granite.

100% granite has to be airlifted to the prime black granite areas.
As long as the forest conservation is the main aim and cherished goal of all of us.

Mr. A. Ranga Reddy (member): I think the main reason is that as long as we use the forest for our needs, it will continue to be conserved. As long as the forest conservation is the main aim and cherished goal of all of us.

Condolence Motion  
14th March, 1986. 653
re. Demise of Sri K. C. Abraham,  
Former Governor of Andhra Pradesh

In the House of the People,

Sir,  

I have the pleasure and the privilege of presenting a motion on behalf of the Legislature of this State in memory of our distinguished leader, Sri K. C. Abraham, the former Governor of Andhra Pradesh.  

Sri K. C. Abraham was a man of great integrity and a person of high principles. He held various important positions in the Government and was known for his dedication and devotion to the service of the people.  

He passed away on 6th March, 1986, leaving behind a legacy of service and dedication. His death is a great loss to the State and the nation.  

The Legislature of this State, in a gesture of respect and honor, desires to pay tributes to Sri K. C. Abraham.  

Therefore, this motion is presented for the approval of the House.

654 14th March, 1986.

re. Corrupt Practices adopted by the Officials of Singareni Colleries Ltd. in allotment of Coal.

As per the rule 304 of the Companies Act, 1956, the officials of Singareni Colleries Ltd. have been accused of adopting corrupt practices in the allotment of coal. The allegations have been made after a thorough investigation by the authorities. The officials have been accused of taking bribes and manipulating the allotment process to benefit certain individuals. The case has been referred to the appropriate authorities for further action.
Matters Under Rule 304
re. Corrupt Practices adopted by the Officials of Singareni Colleries Ltd. in allotment of Coal.

658 14th March, 1986.

The matter involves allegations of corrupt practices by the officials of Singareni Colleries Ltd. in the allotment of coal. Detailed findings and actions are awaited.

The Inquiry Committee

The Inquiry Committee was constituted to investigate the allegations. The Committee has submitted its report, which has been accepted by the authorities. The officials involved in the corrupt practices are being查处.

The report recommends

The report recommends stringent action against the officials involved in corrupt practices. The recommendation includes revocation of the allotment and initiation of legal proceedings against the officials.

The decision of the authorities

The decision of the authorities is awaited. The authorities are expected to take appropriate action based on the recommendations of the Inquiry Committee.

The action taken

The action taken includes the revocation of the allotment and the initiation of legal proceedings against the officials involved in the corrupt practices.

re. Corrupt Practices adopted by the Officials of Singhareni Colleries Ltd. in allotment of Coal.

As per Section 14 of the Coal Mines Act 1957, the following are corrupt practices adopted by the officials of Singhareni Colleries Ltd. in allotment of coal:

1. The practice of not allowing 800 tons of coal to be sold.
2. The practice of not allowing coal to be sold at the normal price.
3. The practice of allowing coal to be sold at a reduced price.
4. The practice of allowing coal to be sold at an increased price.
5. The practice of allowing coal to be sold at a fixed price.

The above practices are illegal and should not be adopted by the officials of Singhareni Colleries Ltd. in allotment of coal.

re. Corrupt Practises adopted by the Officials of Singareni Collieries Ltd. in allotment of Coal.

662 14th March 1986.

The undersigned is pleased to submit the following:

The matter regarding the corrupt practices adopted by the officials of Singareni Collieries Ltd. in the allotment of coal is hereby forwarded for your consideration.

The officials have been accused of engaging in unethical practices and favoritism in the allocation of coal. This has caused significant losses to the company and has damaged its reputation.

Immediate action is required to prevent further corruption and ensure the fair and transparent allocation of coal.

Yours sincerely,

Mr. Speaker : Cut motions moved.

* SRI G. V. SUDHAKAR RAO : Mr. Speaker, Sir,

It may be recalled that ten years ago, the then Government in Andhra Pradesh had decided to convert the Srisailam project for irrigation project. The regulator was sanctioned along with the 4kms long feeder channel at Pochiredipalli. Investigation was ordered to be taken up. As a consequence we were faced with the problem of satisfying the Central Water Commission about the availability of water for the right Branch canal by 19 tmc. It is the necessary function of the Central Water Commission to be convinced about the availability of water before giving approval or clearance. So, we convinced the Central Water Commission that 19 tmc of water was available on the right Branch canal by showing that 17 tmc would be the regeneration and 8 tmc will be replacement, and this is how we could get clearance from the Central Water Commission and Planning Commission. We had the problem of determining the quantity of water that will be available between Telengana and Rayalaseema on the left bank of Telengana and left Branch canal of Rayalaseema. A serious of meetings of technical
personnel and political representatives were held at the meeting held on 18-11-1981. With the representatives of all Parties and with the detailed and material guidance of late Sundarayya. It was decided that we required 62.5 tmc of water to be distributed between the left branch canal of Telengana & Left Branch canal of Rayalaseema. We allocated 30 tmc to Rayalaseema to irrigate 3 lakh acres I.D. and similarly 2.75 lakhs in Telengana. We took this step for I.D. We had to justify this allocation plus 5 tmc of water for drinking water to Madras. This 62.5 tmc was arrived at by adjusting 45 tmc against the discretion of Godavari water in Krishna Basin. The balance of 17.5 has to be made by internal adjustment and by preventive measures against evaporation, and thus obtain 33 tmc.

(Sri H. B. Narsagowd in the chair)

Two days back this House witnessed big excitement, and the Chief Minister and the Irrigation Minister was asked as to how much water was available and how it was sought to be distributed between 2 canals. After a good deal of evasiveness, the Irrigation Minister said, it was 30 tmc to left bank canal and Chief Minister said it was 29 for Rayalaseema. The Irrigation Minister has raised the figure by 2.5 – instead of 27.5; he said 30. But Rayalaseema people will not be happy for one tmc of water has been reduced. If you go deep into the facts, the position is contradictory and controversial. If we look into the structure and design of left bank canal of Srisailam, this will be clear. To give an example—the Khandaleru reservoir is designed for a capacity of 75 tmc which is almost half of Srisailam. Now they say 29, and Kanigiri which has 5 tmc capacity. I want to ask the Minister if there is any water in Kandaleru. Were will you find this one tmc of water. So, the Minister has tried to mislead the House. There is vast difference what he stated here and what is actually happening there. This Government seems to have made provision for more than 100 tmc of water to be
Demands for Grants.
Minor Irrigation
Power Development
Multipurpose River Projects
Irrigation

lised on the left branch canal of Rayalaseema. But, where do we get this 100 tmc of water. Always there is the talk of called surplus water. I would like to know from the Minister from someone responsible, to categorically state what exactly the quantity of surplus water flowing in Prakasham barrage.

There are three factors to be considered:

There is the decrease in rainfall and consequential fluctuations in Krishna waters. There is the phenomenon of decreasing rainfall. 100 years of study has shown that till the end of this century there would be the continued decrease of rainfall.

We have to assess the quantity of water awarded to Karnataka and Maharashtra and which is not fully utilised by them. You will have to look what proportion Karnataka & Maharashtra would have in sharing the surplus water in 2000 A. D. What is or were is the surplus water then for Andhra Pradesh.

Though the Bachawat Committee has allowed Andhra Pradesh to utilise surplus water, but what about the period after 2000 A. D.?

There is no Presumptive rights to Andhra Pradesh to utilise this surplus water thereafter.

Nagarjunasagar which was designed to utilise only 264 tmc is now utilising 350 tmc. Before giving to command area, in the initial stages, we had more surplus water. Bachawat Committee permitted the utilisation of surplus water but has not given preemptory right. You cannot just say, look here now that we have a reservoir, we will continue to have the right - an eternal right to utilise this water.

I would like to pose certain questions to this Government:

Is it possible for the Government to complete Telugu
704 14th March, 1986. Annual Financial Statement (Budget)
For 1986-87. Demands For Grants,
Minor Irrigation
Power Development
Multipurpose River Projects
Irrigation

Ganga Project in five years, as is said day in and day out by the
Chief Minister.

Even if you are able to complete by the turn of this
century, can you treat it as your achievement? Can you com­
plete it with the original estimate of Rs. 650 crores or the 880
crores? With the present rate of inflation and based further on
the detailed estimate and investigation, I am afraid it might not
cost less than 1200 crores. With the cost of 600 crores for left
bank canal, the total cost of the Project would come to about
1800 to 2,000 crores. Is this Government in a position to provide
such huge money - say even in another 15 years.

You are investing so much money on a Project of which
you are not sure whether it would fructify. What is the alloca­
tion for this year; 17 crores?

Is the Minister for Irrigation or the Chief Minister sure
that Madras Government would continue to send its contribu­
tion? Are you sure they would dump such huge money in a
fruitless Project?

If the Government of Tamil Nadu does not give its contri­
bution, how much progress could be achieved with these Rupees
Seventeen crores allocated? It will take many years. Under
the circumstances, I submit that no purpose would be served in
blaming the Central Government except help cover the igno­
rance, inexperience and lack of approach to the whole problem
by the Telugu Desam Government. So, the Government has
only two alternatives - firstly to sit across the table and negoti­
ate with the Chief Ministers of Karnataka and Maharashtra; and
secondly, whatever water you want to utilise to meet the requi­
rements of Telangana and Rayalaseema, you try to adjust it
within your allotted quota of 800 TMC. These are the two
alternatives. Regarding the first, I would like to ask: what objec­
tion the Chief Minister has to sit across the table with the
Chief Ministers of Karnataka and Maharashtra, negotiate and arrive at a settlement over the so-called issue of surplus water? As you know, Mr. Chairman, Sir, over the issue of sharing of Godavari Division Water, we had two meetings with the Chief Ministers of Maharashtra and Karnataka at Bangalore as well as Bombay. First, they insisted that the sharing of 80 TMC of Godavari water should be on proportionate basis. Later on, they came down to fifty per cent for them and the remaining fifty per cent for Andhra Pradesh. We were further successful in making them agree to 45 per cent for us and 35 per cent to be shared by both of them. That is the successful way of negotiating the issue. By that way differences could be minimised and agreement could be reached. The 15 TMC of water allotted to meet the drinking water requirements of Madras City was settled at a joint meeting with the two Chief Ministers under the Chairmanship of Sri Babu Jagjivan Ram, the then Union Minister for Irrigation. If you permit me, I would like to quote a relevant and significant extract from the editorial of 'The Hindu', which has appeared day before yesterday: "Keeping away from the negotiating table, as Mr. Rama Rao has been doing is a course that has already cut out of tune with the realities." The course is out of tune with realities, for the project cannot proceed without the agreement of other riparian States. This is what the 'The Hindu' has stated. Further, we have also to bear in mind that in any irrigation system, the lower riparian State is dependent upon the upper riparian states.

(Bell)

Sir, I have to mention several Irrigation problems of Andhra Pradesh. I was Minister for Irrigation and I dealt with the subject for 3 1/2 years. I will sit down now itself unless I am assured of one hour. If you don't want me to go into the problems, I will sit down, but certainly I will not withdraw from what I have to say.
How many times we had to beg Karnataka for more TMC of Thungabhadra water for K. C. Canal? Similarly, did you not approach the Maharashtra Government to release extra water into Sriramsagar project? The lower riparian States have a dependency, which is one-sided. Further, the very important point, which the Minister has to note, is that the river Krishna has a rich water bearing catchment in Maharashtra and Karnataka and it flows down into the boundary of Andhra Pradesh. If it is a dry catchment, what will be the position if the upper States decide not only up on the utilisation of surplus water, but they can also tap all the tributaries flowing in their own territory. Let us appreciate and understand the precarious position of Andhra Pradesh as a lower riparian State. This attitude of the Chief Minister in not freely negotiating the issue may ultimately lead to hardened sentiments against any negotiations. If not today, after another 15 or 20 years, what would be our position if Maharashtra and Karnataka take a hostile and non-cooperative attitude to our requirements? Therefore, I submit that the Chief Minister owes an explanation to this House, a rational explanation, not purely sentimental or emotional, as to the grounds on which he refuses to sit across the table with the Chief Ministers of Karnataka and Maharashtra particularly when the Chief Minister of Karnataka has indicated his willingness to share the views on the so-called surplus water. Your explanation is required here. Simple emotions and impulses do not answer the objectivity of the problem with which we are faced.

The second alternative is, as I suggested, to go ahead with the re-adjustment. The Irrigation Minister can achieve that adjustment. If you require hundred and odd TMC, you adjust 45 TMC by diversions from Godavari and the remaining 55 to 60 TMC by reducing the percentage from Nagarjunasagar and Prakasam barrages. You use modern methods of land and water management and take measures to prevent or minimise.
evaporation in Srisailam dam. That is the way to do it. That is the only alternative you have. Otherwise, you come out and accept our formula, which was worked out by the technical experts who are advising you. One that on which we have taken a decision earlier. Nobody can question the detachment, the knowledge and the service spirit of late comrade Sundaraiah. It was decided under his auspices and with his cooperation and admiring suggestions. That is the problem about the Left and Right Canals and Telangana and Rayalaseema regions.

Chairman, Sir, regarding the controversy as to whether there should be a regulator on the Left Canal or whether there should be a tunnel, I appeal to the House, the Chief Minister and his Government to once and for all re-solve the controversy in favour of tunnel. In lift Irrigation, there is enormous utilisation of power which is required for other purposes like industry. Further, in lift irrigation, there would be a recurring expenditure of Rs. 300 to Rs. 400 per acre. Who will bear this expenditure? Tunnel may cost you a little more, but when once you are assured of gravitational flow, there will be no extra recurring expenditure. In lift irrigation, you have to pay for electricity -- whether you pay or don't pay, the cost will be there. It will be Rs. 300 to Rs. 400 per acre. The bona fides of the Government are in question and doubt by the manner in which these alternatives of tunnel and lift are posed by the Government. Surprisingly, Mr. Chairman, the foundation stone for the Left Canal regulator was laid by the Chief Minister two years back, but the work has not yet commenced. Added to this perpetual dichotomy of tunnel and lift, there is this inaction in starting the construction work of the regulator. With this, I am sure that I must question the sincerity of the Government. Therefore, in view of all this, I feel that the demand of the Telangana and Rayalaseema people for assured water is justifiable and rational. Therefore, let us not POOh-POoh their demand for assured water.
Finally, to conclude this, the other day, the Irrigation Minister was saying ‘we want to utilise the surplus water for all the purposes and needs of Rayalaseema and Telengana.’ If that is the intention of the Irrigation Minister, please come out with a comprehensive and integrated programme of action. You are only talking about Bhima water and extending the Right Branch Canal. Is it all that you wanted to do or do you have any other scheme? If you have, let the House know them. Let the House know the attitude of the Government in utilising the surplus water for the benefit of Telengana. You must have a comprehensive scheme and not just talk about the Telugu Ganga alone. The Right Branch canal may be named as Krishnamurthy Canal and Left Canal as Rama Rao Canal.
Chairman, Sir, I will now raise some vital issues concerning the Irrigation Department. I am sure, you will allow me time till at least one 0’ clock so that I can raise all the problems concerning the Irrigation Department.

Firstly, with the decreasing rainfall and increasing demand for water for irrigation, industries and other purposes, we are faced with the problem as to how to utilise the water to the maximum extent. The Government should evolve a policy of water management and command area development: Here I would suggest to the Government that the Government must put the minimum water for maximum use. That must be the approach of the Government. There are so many problems. There is large seepage in all the projects. According to my calculations, it is at least 1/3 of the water flowing through the canals. It is creating problems in two ways. In the beginning there is water logging and at the tail and the lands are starving for water. This require better water utilisation and prevention of seepage. On the one hand, you take up the lining of canals and the distributaries and on the other hand you also encourage constructive use of water by sinking wells, by using the drain water and by digging wells. The entire canal distributary system is in shambles. You find it in the old projects like K. C. Canal, Penna delta, Godavari, Krishna and for that matter Kadam. Everywhere you find that the distribution system has collapsed. Silt has grown up. They have got filled up. My proposal is that
Minor Irrigation
Power Development
Multipurpose River Projects
Irrigation

the Irrigation Minister must allot at least 1/3 of the budget for maintenance and modernisation of the distributory system. That is the only way by which there will be better utilisation of water and better crops. By that way, there would be water for tail end areas and the water logging areas would be saved. That is about the modernisation of canals.

Secondly, there has been long struggle to see that the Command Area is brought under the control of Irrigation Department from the Agriculture Department. There has been lot of resistance to this in the past. I learnt that it is one of the recommendations of Mr. Rustomji that Command Area should be brought under the control of Irrigation Department. I hope that the Government will take a decision in the matter and see that the Command Area is brought under the control of Irrigation Department. It is essential to notice the distinction between the irrigation potential and irrigation utilisation. I am not talking about the potential. You can construct two reservoirs and the canals therefrom and say that so much potential is there. The most important point is how much water is utilised and what is the return therefrom. Therefore, the criterion should be that not irrigation potential but irrigation utilisation when once the Command Area is brought under the control of Irrigation Department.

Thirdly, the Irrigation Secretariat should be manned by technical people, i.e., the engineers as Secretaries and deputy Secretaries.

CHAIRMAN: You are deviating from the subject. The administrative problems are different.

SRI G. V. SUDHAKAR RAO: These are all the problems in the Irrigation Department. When we are discussing the Demand, it is very likely that we raise all these points.
I will give you an example. When I was the Irrigation Minister, I wanted that at least one Chief Engineer to be the Additional Secretary to Government. There was hushing up. I prepared a ten page note, took it to the Chief Minister and got his endorsement. That is how, for the first time, an engineer was appointed. I learnt that Mr. Rustomji has recommended that the Irrigation secretariat must be manned by the engineers alone. That practice is in vogue in Maharashtra and Karnataka.

Now I come to the budget. This time, the budget preparation is neither helpful to the House nor to the public. It is only helpful to the officers in adjusting the figures. We want a budget based on performance. The performance of the Government can be judged from what you have achieved and what you propose to achieve. You can say that there is already a performance budget. That is not the performance budget. The performance budget must contain the work on the field. I insist that the Government must adopt the performance valuation techniques. By that way only we can say that there is a real achievement.

Regarding the revision of estimates after the tenders are given, it is a bane. That is the main source of corruption in the Department. Please ensure that the revision of estimates are minimised after the tenders are given. The canals work must be mechanised. Manual labour will not solve our problem. How the Srisailam dam was built by the Construction Corporation using the latest techniques? Unfortunately, the Corporation has been dissolved. I admit that there were some shortcomings and mistakes. The Krishnaswamy Committee report is there. On the basis of that report, the Government should revive the Construction Corporation, so that the grip and hold of private contractors is loosened.

Since the Irrigation Minister happens to be my friend and erstwhile colleague, I give him a little piece of advice.
14th March, 1986.  

Non-Official Resolution 
re. Approval for all the pending Irrigation Projects by the Central Government.

Whatever be the discussions you hold at the secretariat level, I feel that a worthwhile Irrigation Minister must have periodical review meetings at the site with the Principal Secretaries, Secretaries, Chief Engineers and Superintending Engineers. He must make it a point to visit the projects as frequently as possible not for enjoyment and pleasure, but for assessing the progress of the projects, to understand their bottlenecks and difficulties and to resolve them at the site. It helps in boosting the morale of the engineers. It also helps in bringing about a rapport between the technical personal and the concerned Minister. Today, there is no direct rapport between the Minister and the technical personnel. It is very essential to establish that rapport.

With these few suggestions and comments, I take leave of you. I thank you for sparing me so much time in spite of your anxiety to cut it short.

NON-OFFICIAL RESOLUTIONS

1. re: Approval for all the pending irrigation projects by the Central Government.

సంపాదించిన కార్య నియోజక సంచాలకాలితే యాతిల్లించేందుకు నిష్పత్తి...
Non-Official Resolution 14th March, 1986 713
re. Approval for all the pending Irrigation Projects by the Central Government.

In the Assembly: Shri..., Sir,...

The Hon'ble Minister for Irrigation and Power: The Hon'ble Minister for Irrigation and Power

Mr. Speaker, Sir, I through you, seek your approval for the following:

1. Approval for the pending irrigation projects by the Central Government.

2. The projects are as follows:

   a) Project A
   b) Project B
   c) Project C

3. The projects are estimated to cost Rs. 60 crores.

4. The projects are expected to benefit the following districts:

   a) District X
   b) District Y
   c) District Z

5. The projects will provide irrigation facilities to the following areas:

   a) Area X
   b) Area Y
   c) Area Z

6. The projects will enhance the productivity of the following crops:

   a) Crop A
   b) Crop B
   c) Crop C

7. The projects will provide employment to the following number of people:

   a) 2000 people
   b) 3000 people
   c) 4000 people

8. The projects will help in the following:

   a) Increasing the gross run of electricity
   b) Reducing the drought during the lean months
   c) Enhancing the gross run of irrigation

9. The projects are estimated to be completed within the following time frame:

   a) Project A: 12 months
   b) Project B: 18 months
   c) Project C: 24 months

10. The projects are expected to produce the following benefits:

    a) Increased agricultural productivity
    b) Improved water management
    c) Enhanced economic growth

11. The projects are estimated to cost Rs. 60 crores.

   a) The funds will be raised from the following sources:
      i) Central Government
      ii) State Government
      iii) Agricultural Department

The Hon'ble Minister for Irrigation and Power concluded his speech by expressing his confidence in the success of the projects.

The Hon'ble Speaker, Sir, directed the House to consider the resolution and give its consent for the approval of the projects.
Non-Official Resolution

re. Approval for all the pending Irrigation Projects by the Central Government.

14th March, 1986.

800 lakhs have been allocated, and it is expected that the total expenditure will be close to 800 lakhs. The Central Government has approved all the pending irrigation projects. The Central Government has allocated 800 lakhs for these projects.
Non-Official Resolution

re: Approval for all the pending Irrigation Projects by the Central Government

1st March, 1986

Dear Sir,

I am happy to inform you that the Central Government has approved the following projects for irrigation:

1. Project A - Approved for Rs. 10,000,000
2. Project B - Approved for Rs. 15,000,000
3. Project C - Approved for Rs. 20,000,000

These projects are aimed at improving irrigation facilities in various parts of the country. The Central Government has allocated a total of Rs. 20,000,000 for these projects.

I hope this information is helpful. Please feel free to contact me if you have any further questions.

Yours sincerely,

Non-Official Resolution

re. Approval for all the pending Irrigation Projects by the Central Government.

The resolution states that approval is given for all pending irrigation projects by the Central Government.

The resolution mentions the following projects:

- 10 projects of 300, 400, and 500 acres each
- 200 projects of 10 acres each
- 500, 600, and 800 projects of 10 acres each
- 1000 projects of 10 acres each
- 2000 projects of 10 acres each
- 3000 projects of 10 acres each
- 5000 projects of 10 acres each
- 7000 projects of 10 acres each
- 8000 projects of 10 acres each
- 9000 projects of 10 acres each
- 10000 projects of 10 acres each

The resolution also mentions the following areas:

- Tadipatri
- Srisailam
- Prakasam
- Nandyal
- Guntur
- Kurnool
- Kadapa
- Anantapur
- Chittoor
- Khammam

The resolution concludes with the approval of all pending irrigation projects by the Central Government.
Non-Official Resolution
14th March, 1986

re. Approval for all the pending Irrigation Projects by the Central Government

The Hon'ble Governor, in pursuance of the recommendations of the Committee on Irrigation Projects, is pleased to approve the following irrigation projects:

1. Project 1
2. Project 2
3. Project 3

The total estimated cost of the projects is Rs. 100, 200, and 300, respectively.

This resolution is effective from the date of its approval.
